ASEAN as an Actor in International Fora Paruedee Nguitraoool

2015-04-16 ASEAN as an Actor in International Fora addresses a blind spot in ASEAN research and in comparative regionalism studies by assessing why, how, when and to what extent ASEAN member governments achieve a collective presence in global fora. Written for academic researchers and practitioners working in areas such as international relations, political science and international law, it examines ASEAN's negotiating behavior with a novel four-point cohesion typology. The authors argue that ASEAN's 'cognitive prior' and its repository of cooperation norms have affected ASEAN's negotiation capacities, formats, strategies and cohesion in international fora. Using two case studies - one on ASEAN's cohesion in the WTO agricultural negotiations and one on UN negotiations on forced labor in Myanmar - they examine ASEAN's collective actions at different stages of negotiation, in different issue areas and in different negotiating fora. The book concludes by providing recommendations for strengthening ASEAN's international negotiation capacities.

Cooperative Security and the Balance of Power in ASEAN and the ARF

Ralf Emmers 2012-11-12 Emmers questions the dichotomy implicit in this interpretation and investigates what role the balance of power really plays in such cooperative security arrangements and in the calculations

of the participants of ASEAN and the ARF. He offers a thorough analysis of the influence the balance of power has had on the formation and evolution of the ASEAN and ARF and reveals the co-existence and inter-relationship between both approaches within the two institutions. The book contains case studies of Brunei's motives in joining the ASEAN in 1984; ASEAN's response to the Third Indochina Conflict; the workings of the ARF since 1994 and ASEAN's involvement in the South China Sea dispute. It will interest students and researchers of the ASEAN and ARF, the international politics of Southeast Asia, Regionalism and the Balance of Power theory.

The Transformation of Southeast Asian Economies Teofilo C.

Daquila 2007 This book analyses the growth, development and crisis experiences of the Southeast Asian economies, in particular, Indonesia, Malaysia, the Philippines, Singapore and Thailand -- also known as ASEAN-5. The proposition is developed that the robust economic performance of the Southeast Asian economies during the past four decades has been attributed to the various factors, developments and independent national policies which have been pursued by the individual member countries rather than to any regional economic framework. The book covers eleven topics which is suitable for a one-semester course on the economics of Southeast Asia. Also, it has a narrower area coverage as it focuses only on the five economies, namely, Indonesia, Malaysia, the

Philippines, Singapore, and Thailand. The sectoral treatment of the crisis impact and the analytical treatment of policy responses to the crisis differentiate this book from other publications on the same topic. Finally, the book provides an analysis of national developments, policies and factors which have contributed to the economic transformation of the respective Southeast Asian economies.

Routledge Encyclopedia of International Political Economy R. J. Barry Jones 2002-09-11 This three volume Encyclopedia offers the first comprehensive and authoritative survey of the rapidly developing field of international political economy. Its entries cover the major theoretical issues and analytical approaches within the field. The set also provides detailed discussion of the contributions of key individuals and surveys a wide range of empirical conditions and developments within the global political economy, including its major institutions. The Encyclopedia has been designed to be eclectic in approach and wide-ranging in coverage. Theoretical entries range from discussions of the definition and scope of the field, through core methodological questions such as rationalism and the structure-agent problem, to surveys of the major theories and approaches employed in the study of the international political economy.

The 2nd ASEAN Reader Sharon Siddique 2003-10-17 A sequel to the first ASEAN Reader. Some of the classic readings from the original ASEAN reader have been incorporated into this new compilation, but the majority of the readings cover events of the past decade (1993-2003). During this decade ASEAN as an organization was revamped, and its membership increased from six to ten.

An Examination of New Zealand Exports to the ASEAN Countries Harley Douglas Dale 1991

ASEAN into the 1990s A. Broinowski 2016-07-27 ASEAN has its admirers and its critics. In its third decade, it is faced with having to do more than promote the interests of some of the region's most dynamic economies. It has to do more for its six members than just preserve the peace between them. In the 1990s the old leaders of ASEAN will all be gone. What their successors do to make ASEAN cooperation work will determine how many of them join Singapore as a newly industrialised country. The agenda for the 1990s has Indochina near the top, but as well, how to cope with the economic prowess of Japan and the growing military strength of China. ASEAN confronts the need for security both from external and internal threats. Population pressure, income redistribution, insurgency and the influence of Islam will affect all six countries in different ways. This book, a successor to the influential *Understanding ASEAN*, identifies the problems and predicts the responses.

Routledge Handbook of Politics in Asia Shiping Hua 2018-03-15 The Routledge Handbook of Politics in Asia is designed to serve as a comprehensive reference guide to politics in Asia. Covering East, South, Southeast, and Central Asia, this handbook brings together the work of leading international academics to cover the political histories, institutions, economies, and cultures of the region. Taking a comparative approach, it is divided into four parts, including: A thorough introduction to the politics of the four regions of Asia from the perspectives of democratization, foreign policy, political economy, and political culture. An examination of the "Big Three" of Asia - China, India, and Japan - focusing on issues including post-Mao reform, China's new world outlook, Indian democracy, and Japanese foreign policy. A discussion of important contemporary issues, such as human rights, the politics of the internet, security, nationalism, and geopolitics. An analysis of the relationship between politics and certain theoretical ideas, such as Confucianism, Hinduism, socialist constitutionalism, and gender norms. As an invaluable and all-inclusive resource, this handbook will be useful for students, scholars, researchers, and practitioners of Asian politics and comparative politics.

East Asian Economies Toshihiko Kawagoe 1995 East Asia is regarded as growth center in the world today, even as political tension in that region remains high. Economic growth has spilled over from Japan to the Asian newly industrialized economies, as well as to the middle-income countries of the Association of Southeast Asian Nation (ASEAN) through foreign trade and investment. Despite economic growth, an East Asian multilateral security scheme was never created. Will this situation change in the new international environment? With these trends in mind, the collection of articles in this volume sheds light on economic and political issues of natural in East Asia. The articles discuss a comprehensive range of topics: Macroeconomic performance, foreign direct investment, trade policies, financial markets, security arrangements, surveys of recent developments in South Korea, People's Republic of China, and Taiwan. Integration within ASEAN focusing on AFTA and sub-regional co-operation. Integration of Indochinese

economies in to greater Southeast Asian markets.

Security in South-East Asia and the South-West Pacific 1989

Forging a Singaporean Statehood: 1965-1995 Robin Ramcharan 2021-10-25 This work takes an in-depth look at the multi-faceted contemporary relationship between Singapore and Japan since the end of World War II. It is the story of a relationship between an economic superpower, Japan, and an enterprising city-state whose leaders have sought to emulate not only Japan's economic success but several key facets of Japanese society as well. No other country surpasses Singapore in its public admiration of Japan. How is it possible for a multi-ethnic Singapore to emulate a relatively homogeneous Japan? What features of economic and political motives behind the attempt to emulate Japan? These and other questions are addressed in this work, which will be of interest to scholars of the international relations and security of East and Southeast Asia.

Economic and Social Survey of Asia and the Pacific 1988 United Nations Economic and Social Commission for Asia and the Pacific 1988-12-31 This latest edition of the Survey analyzes current economic and social developments in the region against the background of events in the world economy. It also focuses on the serious problems of growth and transformation of the area's least developed and Pacific Island developing economies.

Indonesia's Foreign Policy under Suharto Leo Suryadinata 2022-01-24 The book, which was first published in 1996, examines Indonesia's foreign policy under Suharto. It not only details Indonesia's foreign policy behaviour vis-à-vis Indonesia's neighbours and major powers, but also places it in the context of foreign policy analysis. Today, the book remains as the only full-length study on Indonesia's foreign policy under Suharto. It is now reprinted with a new postscript which discusses the

post-Suharto era from B.J. Habibie to Joko Widodo. Indonesia under Suharto had attempted to become a regional power to lead Southeast Asian states and beyond. As the largest country and also the richest in terms of natural resources, Suharto's Indonesia was held in deference by the ASEAN states. However, due to its limited capabilities, its lack of military strength, advanced technology and economic strength, the political influence of Jakarta was in fact quite limited. During the economic crisis, Suharto was forced to step down. He was succeeded by B.J. Habibie who was largely preoccupied with domestic issues, who in turn was followed by weak presidencies such as Abdurrahman Wahid (Gus Dur) and Megawati. Only after the ex-general Susilo Bambang Yudhoyono assumed presidency did he manage to stabilize the situation and attained economic growth. He even became known as the "Foreign Policy President". Nevertheless, he was constrained by the harsh Indonesian reality: limited resources, a weak military and absence of political influence. His successor Joko Widodo has been more concerned with economic matters and domestic politics; Indonesian regional leadership declines further.

South East Asia in the World-Economy Charles F. Doran 1991-07-26 South East Asia has for many centuries occupied a pivotal position in the wider Asian economy, linking China and the Far East with India and the Middle East, and since the early 1500s the region has also played a major role in the world-economy. South East Asia in the World-economy is a textbook survey of the area's interaction with these wider regional and international structure. Professor Chris Dixon demonstrates how this region's role has undergone frequent and profound change as a result of the successive emergency and dominance of mercantile, industrial and finance capital. He shows how the region has developed as a supplier of luxury product, such as spices; as a producer of bulk primary products; and how, since the mid 1960s, it has become a major recipient of

investment and a favoured location for European and American markets. The author examines how these phases in the evolution of the international economy have been reflected in the relations of evolution of the production and in the spatial pattern of economic activity. He also discusses how the progressive integration of South East Asia in the world-economy has established the dominance of a small number of core areas and produced a pattern of uneven development throughout the region. In a concluding chapter, Chris Dixon explores the prospects for South East Asia in the 1990s in the light of the restructuring of the world-economy.

Growth determinants in East and Southeast Asian economies Hans-Jacob Krümmel 2022 Already in the 1960s the four little dragons Hong Kong, Singapore, South Korea and Taiwan started their industrialization moving steadily upwards with increasing growth rates, some of them double-digit in the 1980s. Most significant for these results has been their export-oriented growth strategy capitalizing on low labour costs and opening them up to the world market with all its benefits and pressures. Until today they have attracted quite a lot of foreign investors bringing technology and skills beside the pure capital. Thus, all four countries have reached a more sophisticated level of production and partly even developed into service and financial centres. Combining these developments with the already advanced Japan, the entire Asia-Pacific Region must be seen as an extremely dynamic area often also mentioned as the Pacific Challenge. Thus it is of high interest to examine the determinants of growth behind this challenge, behind the economic success. Because of the specific Asian dimension of the success, especially the Asian mentality, a transfer of the growth strategy can only be possible to a very limited degree. But the Asian experiences can at least be helpful to the formulation of a country related development strategy showing up generally important growth factors. The contributors to this book analyze important factors such as development planning, foreign investment, deregulation, government intervention, human capital, finance and banking (service sector), technology transfer and promotion, trade (export promotion), agriculture and regional

cooperation. For this purpose experts in Science and Economics report from their experiences.

The ASEAN Success Story Linda G. Martin 1987 The book contains overviews by the prime minister of Thailand and the deputy prime minister of Malaysia. It goes on to deal with such major current issues as rapid urbanization, income inequality, the nuclearization of the family, industrial and trade policies to promote growth, access to Japanese markets, the Kampuchea problem, and the Philippines crisis, as well as with fundamental questions of ASEAN's integration in the economic sphere and its growing contribution to regional and world political stability.

Asia's Miracle Economies Jon Woronoff 2016-09-16 An expanded and updated edition of Woronoff's 1986 study of Asia's emerging economic giants, this book looks back at what has happened in the intervening years, especially as regards the "discovery" of this phenomenon in the Western media and the overreactive hype that has accompanied it. As the author puts it: "My purpose is to show how these countries, which hitherto has been quite unremarkable, began to develop vigorously. What policies and strategies they used. What they did right and, even more importantly, what they did wrong."

Regionalism in East Asia Fu-kuo Liu 2013-10-18 Regional cooperation and integration have emerged as key issues for East Asia following the financial crisis. This book explores these issues, and examines the degree to which a new paradigm is emerging. It reviews the evolution of the concepts and practices of regionalism in East Asia, and considers the factors which are shaping new patterns of regional co-operation and integration. It includes discussions of historical developments, economic co-operation, socio-political factors, and defence and security. It considers the role of those states, including China and Japan, which have distinctive approaches to international relations, and assesses the role of regional international bodies such as ASEAN.

Asian Economic and Political Issues 1998 It is predicted by some

observers that the 21st century will be remembered as the "Asian Century". Many of the countries in the region seem to be able to take the economic and trade baton when one of the others experiences problems. The region, in general, continues to grow economically, politically and militarily. The articles presented in this book examine the current political and economic situations in nations across Asia, particularly focusing on economic developments

Crisis, Recovery, and the Role of Accounting Firms in the Pacific Basin

David L. McKee 2002-04-30 The authors bring the disciplines of accounting and economics to bear on an examination of the critical role played by the major accounting firms in the ongoing economic recovery of Pacific Rim nations from the Asian financial crisis of the late 1990s. Accounting firms, through their service offerings, are having an impact not only on economic indicators, but also on longer-term growth prospects and development patterns in the newly industrialized nations of Southeast Asia (Hong Kong, Singapore, South Korea, and Taiwan), emerging nations (Malaysia, Thailand, the Philippines, and Indonesia) and selected Pacific island nations (including Papua New Guinea, Fiji, and Vanuatu). For practitioners in the private and public sectors and their academic colleagues. Demonstrating the full extent of the influence of global accounting firms on Pacific economies, the authors provide an overview of domestic accounting institutions for each grouping of nations in order to lend valuable context to the discussion of the role of international services firms in each individual jurisdiction. For those whose work or academic accounting services in Southeast Asia, or the role in the region of the World Bank, the International Monetary Fund, and various regional development banks and United Nations agencies.

Wang Gungwu Gungwu Wang 2010 This book of interviews with Professor Wang Gungwu, published to felicitate him on his 80th birthday in 2010, seeks to convey to a general audience something of the life, times and thoughts of a leading historian, Southeast Asianist, Sinologist and public intellectual. The interviews flesh out Professor Wang's views on being Chinese in Malaya; his experience of living and working in Malaysia, Singapore and Australia; the Vietnam War; Hong Kong and its return to China; the rise of China; Taiwan, Japan and India's place in the emerging scheme of things; and on the United States in an age of terrorism and war. The book includes an interview with his wife, Mrs Margaret Wang, on their life together for half a century. Two interviews by scholars on Professor Wang's work are also included, as are his curriculum vitae and a select bibliography of his works. What comes across in this book is how Professor Wang was buffeted by feral times and hostile worlds but responded to them as a left-liberal humanist who refused to cut ideological corners. This book records his response to tumultuous times on hindsight, but with a keen sense of having lived through the times of which he speaks.

Southeast Asia: A Region in Transition, first published in 1991, is a contemporary human geography of the 'market' economies of the region usually defined by membership of the Association of Southeast Asian Nations (ASEAN). Organized thematically, the chapters deal with the environment and development, plural societies, agrarian change and urbanization. This thematic approach provides a comprehensive picture of the ASEAN countries and gives a depth of coverage often lacking in other regional geographies. With a detailed introduction dealing with the physical environment and history of the region, this work will be of great value to students studying the human geography of Southeast Asia, as

well as those with a more general interest in the issues and developments affecting the ASEAN region.
