Photographic Guide to the Sea and Shore Life of Britain and North-west Europe Ray Gibson 2001 This spectacular photographic guide to sea shore animals and plants represents a opletely new approach to field guides. It is aimed at those who wish to find and identify organisms encountered o the sea or immediately offshore quickly and easily while promoting their conservation. Uniquely, each species is illustrated by a photograph and, in most cases, accompanied by a line drawing that emphasizes the critical features for identification and a map to show the distribution of the species in North-West Europe. The text itself deliberately focuses on features that complement the photographs and facilitate identification non-destructively--where, for example, burrowing worms can only be identified by digging them up and therefore killing them, only the cast, the part usually seen, is shown. Stress is laid on the importance of exploiting all available information for locating and identifying each species--if two species have identical appearance they are described separately and behavioral, geographical, or seasonal features that distinguish them are described in the text. There is no other guide to seashore organisms like this one; those available are either less comprehensive or less well illustrated. It will appeal to beachcombers of all levels, from families to students and professionals, as well to divers and those visiting the proliferating numbers of commercially run marine aquaria that are open to the public.

Savage Shore Edward Marriott 2001-03 A critical study of the life cycle, migration, feeding patterns, and behavior of the bull shark, a fearsome predator that makes its home off Nicaragua's Atlantic coast, is set against the backdrop of the lives of the shark fishermen of the region who hunt them. Birds by the Shore Jennifer Ackerman 2019-05-07 From the bestselling author of *The Genius of Birds*, the revised and reissued edition of her beloved book of essays describing her forays along the Delaware shore For three years, Jennifer Ackerman lived in the small coastal town of Lewes, Delaware, in the sort of blue-water, white-sand landscape that draws summer crowds up and down the eastern seaboard. *Birds by the Shore* is a book about discovering the natural life at the ocean's edge: the habits of shorebirds and seabirds, the movement of sand and water, the wealth of creatures that survive amid storm and surf. Against this landscape's rhythms, Ackerman revisits her own history--her mother's death, her father's illness and her hopes to have children of her own. This portrait of life at the ocean's edge will be relished by anyone who has walked a beach at sunset, or watched a hawk hover over a winter marsh, and felt part of the natural world. With a quiet passion and friendly, generous intelligence, it explores the way that landscape shapes our thoughts and perceptions and shows that home ground is often where we feel the deepest response to the planet.

Go forth! Fearless Go out into the world upon Thy mission sweet of sympathy, And love, and cheer. Seek every place. Shun no heart calling in the night For brothers thought, and deed, and voice; But seek thou most earths quiet spots - The wind-blown spaces of the shore; The dwellings clustered close of them That love, and live, and die, upon The sea. There fetch thy sunniest cheer. Enter those homes where great hearts be. That bravely breast the baffling waves Of care and trial that each day Beat ceaseless on the shores of time. Such homes for thine abiding choose - Those sea-side homes fixed firm upon Gray ledges, a-top brown-red cliffs That call and answer to the sea. Wave-Swept Shore Mimi A. R. Koehl 2006-03-07 "Wave-Swept Shore is a spectacular integration of superb nature photography synthesized into a brilliantly lucid explanation of difficult science. This book belongs on the shelf of anybody interested in the seashore."—Paul K. Dayton, recipient of the George Mercer and William S. Cooper Awards from the Ecological Society of America and the E. O. Wilson Naturalist Award from the American Society of Naturalists "Wave-Swept Shore wonderfully combines science and art, providing the reader with an accessible understanding of the incredibly complex coastal ecosystem. In the spirit of Rachel Carson, this book opens our eyes to the wonders of this harsh environment. Anne Wertheim Rosenfeld's photographs are simply beautiful, and at the same time, they describe the shoreline in rich detail. Her images elegantly portray both the art and science of her subjects."—William Neill, author of *Landscapes of the Spirit and Traces of Time and Yosemite: The Promise of Wildness* "Wave-Swept Shore allows the non-specialist to interpret and appreciate life in the remarkable rocky shore habitats of western North America and beyond. Koehl deftly explains how the animals and plants cope with this extreme environment while Rosenfeld illustrates the striking forms and patterns that result. Anyone who enjoys the seashore will enjoy this book; some may even plan to visit the beach because of it."—Richard Strathmann, Professor of Biology, University of Washington

Nag's Head Gregory Seaworthy 2012-06-05 WORTHY READER, a word with you! Were you ever at Nag's Head? Heard you ever of it? I shall provoke no jealousy on the part of Mr. Wiley, the author of "ROANOKE, OR WHERE IS UTOPIA," by saying a word or two of this Ultima Thule in THE OLD NORTH STATE Geography. Briefly, then, a glance at the map will show you a long bank, varying from a few yards to some furlongs in width, extending like a vast breakwater along almost the entire coast of the Carolinas. Through this there are several inlets from the sea, leading into a cordon of beautiful sounds (among which the ALBEMARLE and the PAMLICO are the most considerable), which separate "THE BANKS" from the mainland. In some places, this ridge is as arid as the shores of the Dead Sea. In others, a dwarfish growth of pine and live-oak light up its grim features into a smile of hospitable welcome, from your packet-experience of bodily compressibility to the free air and unfettered gait of THE LAND. Not a little of the picturesque, too, peeps pleasantly out from

among the "Upguines" (as the Bankers call the oak-crested acclivities), and, if I may burden the reader with my own preferences, NAG'S HEAD, "With some fair spirit for its minister," appears to me to possess some very decided features of comfort not enumerated in any of the geographies as belonging to COBI or SAHARA, or whatever other "desert" the titled bard affected to long for as his "dwelling-place." May I venture the opinion that his lordship would sooner have paid rent in the dust and cobwebs of Grub Street? NAG'S HEAD is in latitude 35 30' North, on a narrow part of The Banks, and about midway between Kill-devil Hills and the New Inlet; just at the northern entrance to Roanoke Sound. Enough of description. It was never my forte.

The Cathedral Within Bill Shore 2001-11-13 In this wise and inspiring book, social entrepreneur Bill Shore shows us how to make the most of life and do something that counts. Like the cathedral builders of an earlier time, the visionaries described in this memoir share a single desire: to create something that endures. The extraordinary people Shore has met on his travels represent a new movement of citizens who are tapping into the vast resources of the private sector to improve public life. Among them are: -- Gary Mulhair, who has created unprecedented jobs and wealth at the largest self-supporting human-service organization of its kind, Pioneer Human Services of Seattle. -- Nancy Carstedt of the Chicago Children's Choir, which provides thousands of children their first introduction to music. -- Geoffrey Canada, who has made a safe haven for more than four thousand inner-city children in New York City, from Hell's Kitchen to Harlem. These leaders, and many others described in these pages, have built important new cathedrals within their communities, and by doing so they have transformed lives, including their own.

The Mysterious Mistress Margaret Crosland 2011-09-16 Jane Shore often gets just a byline in history. We know her name, and that she was the mistress of a king. But who was this woman captured for the stage by Shakespeare in 'Richard III', fictionalised by Jean Plaidy and others? Where did she come from? And how was it that having been mistress to the most powerful man in the land, she ended her years in prison and poverty? Jane Shore was born into a family of merchants and was married early, to William Shore. Having already attempted to get her marriage annulled - citing William's impotence - once she became involved with Edward IV it was inevitable that her marriage was dissolved. She is said to have been a benign influence - 'where men were out of favour, she would bring them in his grace' wrote Thomas More - even intervening to save Eton College and King's College from destruction. When the king died, her position became very vulnerable. Sorcery, treason, penance, imprisonment, poverty, escape and execution were key elements in the rest of Jane's life. Margaret Crosland draws on literary, historical and artistic sources to explore Jane's life both before and after Edward's demise.

On a Farther Shore William Souder 2013-09-03 A New York Times Notable Book of 2012 Rachel Carson loved the ocean and wrote three books about its mysteries. But it was with her fourth book, *Silent Spring*, that this unassuming biologist transformed our relationship with the natural world. *Silent Spring* was a chilling indictment of DDT and other pesticides that until then had been hailed as safe and wondrously effective. It was Carson who sifted through all the evidence, documenting with alarming clarity the collateral damage to fish, birds, and other wildlife; revealing the effects of these new chemicals to be lasting, widespread, and lethal. *Silent Spring* shocked the public and forced the government to take action, despite a withering attack on Carson from the chemicals industry. It awakened the world to the heedless contamination of the environment and eventually led to the establishment of the EPA and to the banning of DDT. By drawing frightening parallels between dangerous chemicals and the then-pervasive fallout from nuclear testing, Carson opened a fault line between the gentle ideal of conservation and the more urgent new concept of environmentalism. Elegantly written and meticulously researched, *On a Farther Shore* reveals a shy yet passionate woman more at home in the natural world than in the literary one that embraced her. William Souder also writes sensitively of Carson's romantic friendship with Dorothy Freeman, and of Carson's death from cancer in 1964. This extraordinary new biography captures the essence of one of

the great reformers of the twentieth century.

Midlife Manual for Men Stephen Arterburn 2009-07-01 A fresh and funny--yet utterly serious--book about men and midlife, from the bestselling author of the *Every Man's Battle* series, Stephen Arterburn. Written for every man who is in or near midlife, it examines the roles men inhabit throughout their lives and shows how God uses those roles to build the qualities that make a truly good man. This practical and encouraging book gives men the tools to make the rest of their lives matter. Stephen Arterburn and coauthor John Shore, both men in midlife, speak men's language. They're straightforward, not sugarcoating the issues of aging, fear of death, and feelings of loss or failure. They offer hope and show readers how they can live God-honoring significant lives. This is a book that pastors will want their men's ministries to read, accountability groups will discuss, and wives will buy for their husbands.

The Light of Conscience William Shore 2005-08-09 AN

INSPIRATIONAL MEDITATION ON THE POWER OF

CONSCIENCE—HOW A SIMPLE ACT, A MOMENT OF PURPOSE, CAN CHANGE YOUR LIFE, YOUR COMMUNITY, EVEN THE WORLD We all

struggle at times to know what to do to seek and abide our

conscience—when right and wrong are not black and white, when heart

and head speak with different voices, when our intentions and interests

are not aligned. If you believe that the outcome of these struggles affects

the course of your life, and the lives around you, then this book is for

you. If you believe that there are times and places when the choice an

individual makes to speak or be silent, to eat or fast, to remain seated or

to stand up in a crowd, to stare and remember or to walk on by and

forget, can be as powerful as a president's command, a congressional

appropriation, or a military incursion, then this book is for you. This book

is for you if your profession is rewarding financially but not spiritually, or

if you're ever worried that your career and conscience conflict. This book

is for you if you are a parent whose love of your children never wavers

with the anxiety they cause you but sometimes leaves you wondering

whether they will grow up to do the right thing even if no one is

watching. This book is for you if you question whether the countless

small decisions you make each day add up to a larger judgment about

your life's meaning. Finally, this book is for you if you believe that quiet,

often solitary acts of conscience have echoes louder than the original

sound; that individual acts have the potential to trigger large public

consequences and continue to inspire others from generation to

generation; that such acts bring rewards to the individual, that

unforeseen benefits accrue, that one gains more than was sacrificed, and

that there is a transformative power and richness to a life so lived.

From Shore to Shore Pamela Ferguson 2020-01-21 The poetry and

resource for all interested in spirituality, pastoral counseling and

teaching, creative communication, and cross-cultural mission. Or simply

for those who love poetry.

On a Farther Shore William Souder 2012 Rachel Carson, founder of the

modern environmental movement, began work on her seminal book

Silent Spring in the late 1950s, when a dizzying array of synthetic

pesticides had come into use. Leading this chemical onslaught was the

insecticide DDT. Effective against crop pests as well as insects that

transmitted human diseases such as typhus and malaria, DDT had at first

appeared safe. But as its use expanded, alarming reports surfaced of

collateral damage to fish, birds, and other wildlife. Silent Spring was a

chilling indictment of DDT and its effects, and it shocked the public and

forced the government to take action despite a withering attack on

Carson from the chemicals industry. The book awakened the world to the

heedless contamination of the environment and eventually led to the

establishment of the Environmental Protection Agency and to the

banning of DDT and a host of related pesticides.

Fishcamp Nancy Lord 1997-04-01 "Summers, I live at fishcamp. June

through August, Mondays and Fridays, my partner and I catch and sell

salmon that pass our beach on their way to spawning streams. The rest

of the week, and parts of May and September, Ken and I mend nets,

comb the rocky shoreline for useful poles and cottonwood bark, do a

thousand camp chores and projects. We live quite happily in a tiny cabin

at the top of the beach." --from *Fishcamp* For the past eighteen summers,

Nancy Lord and her partner Ken have made a living, and made a life,

fishing for salmon off the west side of Cook Inlet on the southern coast of

Alaska. In *Fishcamp*, Lord provides a nuanced and engrossing portrait of

their days and months in camp at the inlet. Beginning with their arrival

by plane on a freshly thawed lake, she describes their joys and

tribulations as spring gives way to summer and the long months of

summer unfold. With poetic cadence and magical tone, Lord draws the

reader into life at camp, sharing experiences that range from the

mundane to the sublime: the mending of nets; the muscle-wrenching

labor of the catch; the exquisite pleasure of an improvised hot-tub; the

often unnoticed bounty of the inlet's flora and fauna. Interwoven

throughout the descriptions of quotidian adventure are threads of the

deeper history of the region -- stories and legends of the native Dena'ina;

anecdotes about past and current inlet residents; discussions of the lives

of their neighbors, both human and animal, who, like them, live with fish.

Fishcamp is Nancy Lord's eloquent paeon to the place she calls home. In

clear and richly textured prose, she captures the simple beauty of a life

lived with nature, "a part" rather than "apart." As Lord explains, she

shows us in *Fishcamp* "something about what even one place and its

infinitely varied life contributes to the connections among us all and to

the wholes we call 'world' and 'culture.'...Wherever our places are and

whatever we do in them, perhaps we might all begin to pay more

attention to the little and big things that do indeed connect in profound

ways to all the rest, miles and eons and cultures apart." *Fishcamp* is a

remarkable combination of personal, cultural, and natural history from

what will surely be recognized as one of the most talented new voices of

our time.

Caviar and Ashes Marci Shore 2006-01-01 "In the elegant capital city of Warsaw, the editor Mieczyslaw Grydzewski would come with his two dachshunds to a cafe called Ziemianska." Thus begins the history of a generation of Polish literati born at the "fin de siecle." They sat in Cafe Ziemianska and believed that the world moved on what they said there. "Caviar and Ashes" tells the story of the young avant-gardists of the early 1920s who became the radical Marxists of the late 1920s. They made the choice for Marxism before Stalinism, before socialist realism, before Marxism meant the imposition of Soviet communism in Poland. It ended tragically. Marci Shore begins with this generation's coming of age after the First World War and narrates a half-century-long journey through futurist manifestos and proletarian poetry, Stalinist terror and Nazi genocide, a journey from the literary cafes to the cells of prisons and the corridors of power. Using newly available archival materials from Poland and Russia, as well as from Ukraine and Israel, Shore explores what it meant to live Marxism as a European, an East European, and a Jewish intellectual in the twentieth century.
