Strategies for Teaching

Strings Donald L. Hamann

2009 Designed for use in undergraduate-level string methods, techniques, and pedagogy courses, this comprehensive text provides all the information necessary to develop and manage a successful school-based string or orchestra program at elementary through secondary levels. The text begins by introducing the string instrument family and presenting an overview of the school orchestra program. Subsequent chapters - divided into three levels of string competency corresponding to elementary, middle, and high school skills - cover performance goals and objectives, strategies for teaching technical and performance skills, and solutions to common playing problems for each ability level. Rehearsal planning and preparation, rehearsal techniques, practical approaches to teaching improvisation, student recruitment and retention, and

choosing literature for the school orchestra are also covered.

Orchestral Bowing: Style and Function James Kjelland

This text addresses the elements of sound production, bowing technique, terminology, and musical interpretation---all with integrated teaching suggestions. 3rd and 5th Position String

Builder Samuel Applebaum
The Third and Fifth Position

String Builder is to be used after Book 3 of the Belwin String Builder. However, it may also be used as a continuation of any the standard string class methods. In this book, the violin, viola, cello, and bass play together. The book for each instrument, however, is a complete unit and may be used separately for class or individual instruction. In this book, the pupil is carefully taken step by step through the third and fifth positions. The pupil is taught to find each finger, after which simple shifts are introduced with the same finger, followed by shifts to these positions with different fingers. Each type of shift is presented and developed with interesting melodies. The material in this volume is chosen for its musical interest and its technical value. There are a number of duets which are to be played by either two pupils or with the class divided into two groups. The material in this book is realistically graded so that only a minimum of explanatory material is

required. Suggestions for work by rote are presented throughout the book. Published for violin, viola, cello, bass, piano accompaniment, teacher's manual.

The Art of Sensuality and Its Impact on Great String

Playing Alan de Veritch

2014-02-07 One of the major frustrations of my professional musical life has been the continual reminder of how few talented young string players, even those with exceptional instrumental skill, seem to truly understand the importance of reflecting their very own personal emotional experiences within the fabric of their musical interpretations and performances.

Consequently I have devoted a great deal of my teaching efforts to helping these potential artists better understand the critical importance of this element and to develop the skills necessary to facilitate the natural merging of their inner-most

emotions with their instrumental facility. My original purpose for authoring this book was to create a lasting way in which to share my resulting theories and methodologies with regards to this ever so critical ingredient to the process of successful musical communication.

Interestingly, after a reasonable amount of academic research, it quickly became apparent to me that in spite of the existence of numerous available publications dealing with the need for musicians to play their instruments in an expressive manner and a myriad of additional books and articles attempting to describe and analyze the elements of sensuality no one had previously made any detailed connection or addressed, in writing, the impact of sensuality on music performance from either a technical or musical perspective. Now that this project is complete I must agree with the opinion of a number of my trusted colleagues and friends: many

theories, concepts and methods described in this book could indeed provide benefits to a far broader audience than those exclusively focused on string playing. I am hopeful that performers from all of the arts as well as any interested and receptive individuals from all walks of life may find the thoughts I have expressed in this publication helpful in achieving the lives of their dreams.
