The Protected Vista draws a historical lineage from the eighteenth-century picturesque

to present-day planning policy, highlighting how the values embedded within familiar views have developed over time through appropriation by diverse groups for cultural and political purposes. The book examines the intellectual construction of the protected vista, questioning the values entrenched within the view, by whom, and how they are observed and disseminated, to reveal how these views have

been, and continue to be, part of a changing historical and political narrative. With a deeper knowledge and understanding of the shifting values in urban views, we will be better equipped to make decisions surrounding their protection in our urban centres. The book identifies the origins of current view protection policy in the aesthetic convention of the picturesque, drawing on a range of illustrated examples in the UK, the US, Australia, Canada and South Africa, to serve as a useful reference for students, researchers and academics in architecture, architectural conservation, landscape and urban planning.

Nonesuch Place T. Tyler Potterfield 2009-06-02
Intentionally built on the fall line where the Piedmont uplands meet the Tidewater region, Richmond has always been a city defined by the land. From the time settlers built a city on rugged terrain overlooking the James River, the people have changed the land and been changed by it.

Few know this better than T. Tyler Potterfield, a planner with the City of Richmond Department of Community Development. Whether considering the many roles of the "romantic, wild and beautiful" James River through the centuries, describing the rationale for the location of the Virginia State Capitol on Shockoe Hill or relating the struggle to reclaim green space as industrialization and urban growth threatened to remove nature from the city, Potterfield weaves a tale as ordered as the gridded streets of Richmond and just as rich in history.

three curiously bound volumes of drawings and documents created between 1821 and 1858 by a long—and unjustifiably—forgotten architect named Thomas R. Blackburn. Inspection revealed that these were, in fact, no ordinary documents but a unique window onto the life of a distinguished builder and his revered master: Thomas Jefferson. In these extraordinary books, we find Blackburn, at first a young carpenter, engaged in the construction of Jefferson's famed "academical village" at the University of Virginia. He simultaneously embarked on an ambitious program of architectural study, guided, it appears, by Jefferson himself. The drawings he executed in the four decades that followed—extraordinary ink and watercolor explorations of his many residential and civic commissions—bear witness to his emergence as a mature and prolific architect in his own right. In Jefferson's Shadow is a unique document of the relationship between an

unknown but highly skilled country builder and the American statesman widely considered this nation's first gentleman architect. But it is also an indispensable resource on the little-understood practice of architecture in the early and mid-nineteenth century.

Lost Virginia Bryan Clark Green 2001 Literally hundreds of Virginia buildings of architectural or historical interest have vanished. Most were demolished or burned, while others were abandoned as populations and needs shifted. The consequence is that important models of architectural accomplishment and key symbols of human aspiration and achievement have disappeared and are largely forgotten. Lost Virginia is an effort to document and reconstruct the appearance of Virginia architecture in earlier times, when the nation's destiny and history were intimately tied to the Old Dominion's landscape and buildings. It seeks to recover, at least on paper, an

impression of our lost architectural heritage. Organized into categories of domestic, civic, religious, and commercial buildings, the more than three hundred vanished structures illustrated within include slave pens in Alexandria, George Washington's singular sixteen-sided barn, a one-room schoolhouse in Greene County, and the 18th-century Valley homes--long mistaken for forts--of German-speaking settlers. Soldiers in both blue and gray tramped by the now-lost Rockingham County courthouse, and a cathedral-like federal post office in Roanoke joins Rockbridge County's fantastic Alleghany Hotel on the list of exceptional but short-lived buildings. Also documented are creations like Frank Lloyd Wright's Larkin Company Pavilion, destroyed just months after it had been erected for the Jamestown Tercentennial Exhibition, and the Thomas Jefferson-designed Barboursville in Orange County. --jacket.

Buildings of Virginia Richard Guy Wilson 2002 Old Dominion's built environment has grown and changed extensively since its beginnings and the Buildings of Virginia reflects those changes. The book chronicles Williamsburg, a restored eighteenth-century town with the Governor's Palace and the Christopher Wren building. And journeys farther west to Richmond, the state capitol, designed by Thomas Jefferson. It then captures the many historical sites including the birthplaces of George Washington and Robert E. Lee in Westmoreland County. Along with this, the chapters delve into the agricultural history of the state, the expansion of the railroad, and construction of deepwater facilities. And, finally, to the times during and after World War II when manufacturing, military activities, and the growth of the federal establishment accelerated the trends toward industrialization and

Approximately 800 buildings and 450 photographs and maps are included in this volume's discussion, truly exhibiting the range of architecture that make up this region. True Richmond Stories Harry Kollatz Jr. 2007-07-31
Richmond, Virginia's beautiful capital on the James River, has seen more than its fair share of history. Although it is probably best known as the site of one of the first English settlements in America and its role as the

Confederate capitol in the Civil War, the city's past has much more to offer. Since 1992, Harry Kollatz Jr. has been recording the lesser-known heritage of Virginia's Holy City in his "Richmond Flashbacks" column in Richmond magazine. From the inauguration of the world's first practical electric trolley system an early Civil Rights activists, to a psychic horse and a wild ride on a sturgeon, he has covered it all. Compiled for the first time in this volume, this selection of articles is sure to delight all who love Richmond by shedding light on the rest of its story.

Richmond Landmarks Katarina M. Spears 2012 Richmond boasts a long, rich history--early-17th-century English exploration, the 18th-century economic and philosophical road to the American Revolution, the center of the domestic slave trade in the 19th century, and the capital of the Confederate States of America during the Civil War. Much of Richmond's history reflects a national history, and its important landmarks span several centuries, ranging from historic cemeteries to iconic buildings to grand-scale monuments. While these landmarks of national significance are a great draw for visitors, many of the city's

lesser-known landmarks are a great source of local pride and provide a strong sense of place for Richmond natives and residents. Utilizing the historic prints, photographs, and documents collection of the Library of Virginia, *Richmond Landmarks* explores some of the most iconic landmarks of the city's social and cultural history.

The Richmond Theater Fire

Meredith Henne Baker

2012-03-14 On the day after

Christmas in 1811, the state of Virginia lost its governor and almost one hundred citizens in a devastating nighttime fire that consumed a Richmond playhouse. During the second act of a melodramatic tale of bandits, ghosts, and murder, a small fire kindled behind the backdrop. Within minutes, it raced to the ceiling timbers and enveloped the audience in flames. The tragic Richmond Theater fire would inspire a national commemoration and become its generation's defining disaster. A vibrant and bustling city, Richmond was synonymous with horse races, gambling, and frivolity. The gruesome fire amplified the capital's reputation for vice and led to an upsurge in antitheater criticism that spread throughout the country and across the Atlantic. Clerics in both America and abroad urged national repentance and denounced the stage, a sentiment that nearly destroyed theatrical entertainment in Richmond for decades. Local churches, by contrast, experienced a rise in

attendance and became increasingly evangelical. In *The Richmond Theater Fire*, the first book about the event and its aftermath, Meredith Henne Baker explores a forgotten catastrophe and its wide societal impact. The story of transformation comes alive through survivor accounts of slaves, actresses, ministers, and statesmen. Investigating private letters, diaries, and sermons, among other rare or unpublished documents, Baker views the event and its outcomes through the fascinating lenses of early nineteenth-century theater, architecture, and faith, and reveals a rich and vital untold story from America's past.

Historic Richmond Churches & Synagogues Walter S. Griggs Jr. 2017-09-04 Richmond's historic houses of worship cannot be separated from the city's storied past. A young Patrick Henry sparked a revolution with his "Give Me Liberty or Give Me Death" speech inside St. John's Episcopal Church on Church Hill. Congregation Beth

Ahabah, with its awe-inspiring windows and adjoining museum, is one of the oldest and most revered synagogues in the country. An interstate highway was moved to save the Sixth Mount Zion Baptist Church, where John Jasper asserted, "De Sun do move," in the most famous sermon ever preached in the city. Beloved local author Walter Griggs Jr. tells the compelling history of Richmond's most holy places. Tottenville Barnett Shepherd 2010-03-10 Tottenville is located on the southwestern tip of Staten Island and is the southernmost point in New York City and New York State. Far from the urban culture of Manhattan, Tottenville boasts a feeling of independence and isolation. The village of Tottenville came into being around 1840. Its economy and culture arose from oyster fishing, shipbuilding and ship repair, and agriculture. Its trade routes with New Jersey and New York City linked it to the metropolitan region and the greater world. It became the largest town in Westfield,

the historic name for this quarter of Staten Island. Even today, although a part of New York City, and encroached upon by modern suburban culture, the feeling of a small coastal town prevails with characteristics unlike any other place on Staten Island. This book documents the activities of the people who created Tottenville and caused it to flourish.

Historic Richmond Town, established in 1958 by the Staten Island Historical Society and the City of New York, is a 100-acre historic village. With many carefully-restored sites, the area boasts events, tours, and places to visit. The photographs that make up this fascinating visual history bring to life the rich cultural heritage of this unique area. Like layers of antique paint, years peel

back, revealing scenes from a time when things seemed simpler. As we turn the pages, we visit the Voorlezer House, St. Andrews Church, the Lighthouse, the home designed by Frank Lloyd Wright, and the Jacques Marchais Museum of Tibetan Art.

The Making of Virginia Architecture Charles E. Brownell 1992
The long tradition of architecture in Virginia begins with the earliest structures at the Jamestown settlement in 1607, and continues today with some of the most advanced buildings yet completed anywhere. In its legendary landmarks -- Mount Vernon, Monticello, the Virginia Capitol building in Richmond, the James River plantation mansions, the Reynolds Metals headquarters building in Richmond, Washington National Airport, and Dulles International Airport -- as well as in homes, churches, stores, and office buildings across the state, Virginia's architecture is a mirror of the many expressions of America's built

environments. This book invites the readers on a journey through the eye and mind of the architect, from the very drawings that give shape and form to the idea, through the tracks and traces found in long lost letters, office records, and other primary sources. You will never see the buildings around you, anywhere, in the same way again. -- From publisher's description.
