**Rational Mysticism** John Horgan 2004-03-22  
The author of *The End of Science* chronicles the most advanced research into such experiences as prayer, fasting, and trances in this “great read” (The Washington Post). How do trances, visions, prayer, satori, and other mystical experiences “work”? What induces and defines them? Is there a scientific explanation for religious mysteries and transcendent meditation? John Horgan investigates a wide range of fields—chemistry, neuroscience, psychology, anthropology, theology, and

more—to narrow the gap between reason and mystical phenomena. As both a seeker and an award-winning journalist, Horgan consulted a wide range of experts, including theologian Huston Smith, spiritual heir to Joseph Campbell; Andrew Newberg, the scientist whose quest for the “God module” was the focus of a Newsweek cover story; Ken Wilber, prominent transpersonal psychologist; Alexander Shulgin, legendary psychedelic drug chemist; and Susan Blackmore, Oxford-educated psychologist, parapsychology debunker, and Zen practitioner. Horgan explores the striking similarities between “mystical technologies” like sensory deprivation, prayer, fasting, trance, dancing, meditation, and drug trips. He participates in experiments that seek the neurological underpinnings of mystical experiences. And, finally, he recounts his own search for enlightenment—adventurous, poignant, and sometimes surprisingly comic. Horgan’s conclusions resonate with the controversial

climax of The End of Science, because, as he argues, the most enlightened mystics and the most enlightened scientists end up in the same place—confronting the imponderable depth of the universe.

Excerpt: The Transcendental Meditation  
technique is a specific form of mantra  
meditation developed by Maharishi Mahesh  
Yogi. It is often referred to as Transcendental  
Meditation or simply, TM. The meditation  
practice involves the use of a mantra and is  
practiced for 15-20 minutes twice per day while  
sitting with one's eyes closed. It is reported to be  
one of the most widely practiced, and among the  
most widely researched, meditation techniques,  
with over 340 peer-reviewed studies published.  
The technique is made available worldwide by  
certified TM teachers in a seven-step course,  
and fees vary from country to country.

Beginning in 1965, the Transcendental Meditation technique has been incorporated into selected schools, universities, corporations, and prison programs in the U.S.A., Latin America, Europe, and India. In 1977 a U.S. district court ruled that a curriculum in TM and the Science of Creative Intelligence...

Psychiatry and the Cults John A. Saliba

2018-09-24 Originally published in 1987, this title was compiled in response to the concern, in

some segments of society, about the presence of new religious movements in the West in the second half of the twentieth century. There are lots of psychological questions surrounding cults and the influence they have over their members. These questions have been operative in the accumulation of this annotated bibliography, which was intended primarily as a reference guide for psychiatrists and counsellors who advise cult members, ex-cult members and their bewildered parents, and lawyers who use psychiatric arguments in the courts.

**Divine Mania** Yulia Ustinova 2017-10-16 'Our greatest blessings come to us by way of mania, provided it is given us by divine gift,' - says

Socrates in Plato's Phaedrus. Certain forms of alteration of consciousness, considered to be inspired by supernatural forces, were actively sought in ancient Greece. Divine mania comprises a fascinating array of diverse experiences: numerous initiates underwent some kind of alteration of consciousness during mystery rites; sacred officials and inquirers attained revelations in major oracular centres; possession states were actively sought; finally, some thinkers, such as Pythagoras and Socrates, probably practiced manipulation of consciousness. These experiences, which could be voluntary or involuntary, intense or mild, were interpreted as an invasive divine power within one's mind, or illumination granted by a super-human being. Greece was unique in its attitude to alteration of consciousness. From the perspective of individual and public freedom, the prominent position of the divine mania in Greek society reflects its acceptance of the inborn human proclivity to experience alteration of

consciousness, interpreted in positive terms as god-sent. These mental states were treated with cautious respect, and in contrast to the majority of complex societies, ancient and modern, were never suppressed or pushed to the cultural and social periphery.

Cognitive Models and Spiritual Maps Jensine Andresen 2000 This book throws down a challenge to religious studies, offering a multidisciplinary approach - including developmental psychology, neuropsychology, philosophy of mind, and anthropology.

**Bounded Choice** Janja A. Lalich 2020-11-30 Heaven's Gate, a secretive group of celibate "monks" awaiting pickup by a UFO, captured intense public attention in 1997 when its members committed collective suicide. As a way of understanding such perplexing events, many have seen those who join cults as needy, lost souls, unable to think for themselves. This book, a compelling look at the cult phenomenon written for a wide audience, dispels such simple

formulations by explaining how normal, intelligent people can give up years of their lives—and sometimes their very lives—to groups and beliefs that appear bizarre and irrational. Looking closely at Heaven's Gate and at the Democratic Workers Party, a radical political group of the 1970s and 1980s, Janja Lalich gives us a rare insider's look at these two cults and advances a new theoretical framework that will reshape our understanding of those who join such groups. Lalich's fascinating discussion includes her in-depth interviews with cult devotees as well as reflections gained from her own experience as a high-ranking member of the Democratic Workers Party. Incorporating classical sociological concepts such as "charisma" and "commitment" with more recent work on the social psychology of influence and control, she develops a new approach for understanding how charismatic cult leaders are able to dominate their devotees. She shows how members are led into a state of "bounded

choice," in which they make seemingly irrational decisions within a context that makes perfect sense to them and is, in fact, consistent with their highest aspirations. In addition to illuminating the cult phenomenon in the United States and around the world, this important book also addresses our pressing need to know more about the mentality of those true believers who take extreme or violent measures in the name of a cause.

My Enlightenment Delusion Matt Landing  
2017-03-22 Matt Landing recounts the ups and downs as a Transcendental Meditation teacher. After a 1990 kundalini crisis, he thought he was enlightened, but he later painfully became aware that it was a grandiose delusion. Matt reflects on kundalini, mania, epileptic religiosity, psychedelic experience, and the experiences of people who claim enlightenment. Matt provides an entertaining account of his life with a look behind the scenes of the TM organization,

advanced training courses, and the TM-Sidhis course. The book also contains a thought-provoking analysis of kundalini, enlightenment, celibacy, gurus, kriyas, speaking in tongues, Pure Awareness, super radiance, and reincarnation. Matt explains why the similarities between grandiose delusions, psychotic mania, and kundalini crises are more than a coincidence. He provides recommendations for those who are in the midst of a kundalini crisis. Matt explains how spiritual aspirants become ungrounded and offers suggestions on how to become grounded. He provides evidence against the existence of enlightenment. He looks at some of the unflattering characteristics of gurus and labels them as "guru maniacs". Beginning in 1972 while reading books in college, Matt acquired a desire to reach enlightenment. He then learned TM, went on numerous TM residence courses, practiced the TM-Sidhis program, ate a predominately raw food diet, fasted, detoxed his body, and used self muscle

testing. His spiritual practice took 3 hours per day and included asanas, pranayama, and meditation. Matt delivers a powerful punch against enlightenment, gurus, spiritual movements, and religions. Matt strikes at the concepts of karma, kundalini, shaktipat, faith, support of nature, devotion to a guru, Pure Awareness, and right action. Version 2.00 of My Enlightenment Delusion is a 60,000-word book that was completed in December 2017 and contains the original material in Version 1.00 plus 7 additional chapters. Chapter 13 contains a comparison of epileptic religiosity with kundalini crises and mania. Chapter 21 juxtaposes spiritual experiences, psychedelic experiences, mania, near death experiences, and G-force induced loss of consciousness. Chapter 22 discusses Robert Forman's book Enlightenment Ain't All It's Cracked Up To Be and the unrealistic, rosy picture that enlightenment brings an end to all suffering. Chapter 23 is devoted to looking at the

disquieting aspects in the lives of Suzanne Segal, Ramana Maharshi, and Gopi Krishna who are all departed but continue to inspire many spiritual seekers. Chapter 24 thoroughly describes the enlightenment experiences of 22 individuals and then offers a critique of their experience.
