Valley Towns of Connecticut (Classic Reprint) Martha Krug Genthe 2017-12-08 Excerpt from Valley Towns of Connecticut The Connecticut Valley is a very thankful object for such studies. It is really a double valley, being divided into two unequal parts by the chain of trap ridges which extends from New Haven to Holyoke and beyond. The valley east of the ridges has the present river; it will therefore be designated by the name of River Valley. The valley west of the ridges has at present no connected watercourse; its line of lowest depression is divided up among several smaller watercourses running in different directions but leading practically nowhere. According to its drainage it may be divided into two parts in its turn: the northern part, generally speaking, drains into the Connecticut by way of the Farmington River, and its southern limit is, approximately, the town of Cheshire; we shall designate it as the Farmington Valley. The southern part drains into the Sound by various small rivers converging more or less toward New Haven, and it will be called the New Haven Valley (fig. I). This natural division into an eastern, or River Valley, western, or Farmington Valley, and southern, or New Haven Valley, we shall find repeated in. The political history of the Valley settlements. Theodate Pope, May Twenty-Ninth, Nineteen Hundred and Six Madame President and members of the Society of Colonial Dames: The first formal visit of your society to this old colonial village seems to demand not only words of

hearty welcome but some introduction to the town as it was in colonial days. I will not weary you with any formal history, but, during the short time available, will try to give you a few passing glimpses of Farmington as it was on the 29th day of May, 1706.
