Red Army and Society Ellen Jones 2021-01-26 This book, first published in 1985, is the first full-length study of the Soviet Armed Forces as a social institution. Using military manpower as a substantive focus, it identifies those characteristics that the Soviet military shared with counterparts in non-communist systems and those that were unique to the society and political culture in which it was embedded. The discussion encompasses defence policy-making as a whole and focuses on conscription policy, the characteristics of the professional military, the role of the political officer, the mechanics of political socialization within the Red Army, and the experience of ethnic minorities in the armed forces. This analysis provides a window through which we can observe the broader military system at work; how that system affects, and in turn is affected by, the economic, social and political life of the Soviet Union. It contributes to our understanding of civil-military relations in communist systems and to our knowledge of Soviet political and social trends.

The Red Army and the Wehrmacht I[rii] Leont'evich D'i[a]kov 1995 In this new book, based on once secret archives of the former Soviet Union, the revival of the German armed forces - known as the Wehrmacht - is shown to have depended largely on the assistance of the Soviet Union. Russian historians Dyakov and Bushuyeva publish here for the first time Soviet documents that detail the training of German forces and the

building of new equipment, such as tanks and airplanes, in a shroud of secrecy on Soviet territory.

The Soviet Soldier Herbert Goldhamer 1975

The Ethnic Factor in the Soviet Armed Forces Thomas S. Szayna 1991 Open ethnic conflict has swept the entire Soviet Union during the last few years. The Muslims already have had a powerful negative impact on the efficiency of the Soviet military. This report examines the Muslim dimension of the ongoing ethnonational ferment affecting the Soviet armed forces. In particular, it analyzes the impact of the rapidly increasing Muslim cohort on the cohesion of the Soviet military by focusing on factors affecting the ability and reliability of Muslim servicemen today. Problems such as language deficiencies, trainability, and socialization are discussed in detail, as are efforts by the military leadership to ameliorate them. The author critiques some earlier methods for dealing with the subject and considers the implications of the ethnic ferment for armed forces reform.

World War II Soviet Armed Forces (3) Nigel Thomas 2012-11-20 This book presents a detailed analysis of the Soviet armed forces during the final days of the war, covering the soldiers that successfully turned the tide against the Nazi onslaught and pushed it back into Germany itself. This final part of the series documents the Red Army's push through Germany to Berlin, which eventually culminated in the surrender of the German forces to the Allies in 1945. It also offers a detailed breakdown of all the armed forces that conducted the offensive campaigns on the Eastern Front, including the army, air force, paratroopers, navy and NKVD troops. It also reveals in colourful illustrations the uniforms and organizations of the Russian forces serving against Japan until the eventual surrender of all Japanese Imperial forces in August 1945.

The Armed Forces Of The Ussr Harriet Fast Scott 2019-07-16 This up-to-date analysis of the development and organization of the Soviet Armed Forces provides a profound insight into the military thinking that has determined the course of Soviet military history from the birth of the first Communist armed forces organization to the present. The eminent authors of this book have drawn on thousands of Soviet Ministry of

Defense publications—only a very few of which have been translated into English—and four years of research in the USSR to portray the fundamentals of Soviet military doctrine and strategy. They cover fully the postwar development of the Soviet military, looking at the High Command, each of the five services, combat formations, and supporting agencies, and give a comprehensive account of the Soviet military-industrial complex, military training of Soviet youth, military manpower, mobilization, and the Soviet officer corps. Their discussion of the relationship between the Party and the Armed Forces, based on Soviet data, includes an examination of popular Western myths about internal Soviet military-Party splits. The wealth of detailed information contained in this book includes numerous notes, tables, and figures and a broad range of other data—all based exclusively on primary sources—as well as an extensive bibliography.

The Military Uses of Literature Mark T. Hooker 1996-05-14 This book studies the made-to-order genre of socialist-realist fiction that was produced at the direction of the Main Political Directorate of the Soviet Army and Navy (MPD) as a part of the war for men's minds waged by the Soviet State. The first chapter is a history of the genre, tracing it from its roots in the Revolution to the dissolution of the MDP in 1991. Topics examined in the book include the attitude toward Germans following World War II; the retirement of the World War II generation; military wives; Dear John letters; life at remote posts; the military as a socializing institution; the use of lethal force by sentries; attitudes toward field training exercises, heroism, and initiative; legitimacy of command; and the reception of Afghan vets.

Soviet Military Operational Art Colonel David M. Glantz 2012-11-12 David Glantz examines the Soviet study of war, the re-emergence of the operation level and its connection with deep battle, the evolution of the Soviet theory of operations in depth before 1941, and its refinement and application in the European theatre and the Far East between 1941 and

The Soviet High Command, 1967-1989 Dale Roy Herspring

2014-07-14 The recent transformations in the USSR are nowhere more evident than in the Soviet military. Top-level military officers have been relieved of their positions, Gorbachev has warned of lean times for the military, the symbolic role of the armed forces has been downgraded, and the concept of "military sufficiency" points to major modifications in Soviet force structure. Contrary to some who see Gorbachev as a Sir Galahad out to slay the evil military high command, Dale Herspring concludes that the relationship between the highest Soviet political and military leaders is at the moment more symbiotic than conflictual. In this first in-depth study of the evolution of civil-military relations in the Soviet Union from 1967 to the present, he shows how the views of senior military officers have varied over time: currently, even if the members of the high command do not like all Gorbachev's changes, they understand the need for them and are prepared to live with them. As Herspring looks at the personalities and politics of eight top military figures, he reveals that the most important of them, Ogarkov, was the first senior Soviet military officer to understand the value of working with the political leadership. Ogarkov believed that the arms control and dtente processes, if carefully managed, could enhance the national security of the USSR. In Gorbachev, the Soviet military has found the type of individual that Ogarkov was seeking. Originally published in 1990. The Soviet Defence Industry Complex from Stalin to Krushchev J. Barber 1999-12-08 The huge complex of Soviet institutions and enterprises specialised in military production powerfully influenced the course of the twentieth century through resistance to imperial Japan, the defeat of Nazi Germany, and nuclear stalemate with America in the Cold War. Based on collaborative research by Russian and British scholars in

the hitherto secret archives of the Soviet government, party, and armed forces, this book is a pioneering investigation of the economic dynamics and social and political significance of Soviet defence.

The Officer's Handbook Soviet Ministry of Defense 2019-10-18 Finally, a clean copy. This handbook is intended to assist "officers in broadening their outlook and in resolving many practical problems related to the training and education of subordinates. Organizational principles of the Soviet Armed Forces, including a discussion of Soviet concepts of cadre organization, centralization, and unity of command are covered in Chapter One. The next chapter is concerned with the relationship between the Communist Party of the Soviet Union and its Armed Forces, and more specifically between the Party's Central Committee, the Main Political Directorate, the Ministry of Defense, and the Party organizations in military units. Much of this information is pertinent even today and the principles presented continue to be inculcated throughout the Russian armed forces.

First, I want to thank Robbin Laird, not only for his professional encouragement over the years, but especially for his suggestion to do this book in the first place. Nor would this effort have been possible--or nearly as enjoyable-- without the support and

friendship of Susan McEachern. I would also like to thank Jackie Evans for her assistance in helping to prepare the manuscript.

The Armed Forces Of The Ussr Harriet & William F Scott 1984-10-25

The Party and the Army in the Soviet Union Yosef Avidar 1985 This remarkable piece of research uncovers the complex relationship between the Communist Party and the Armed Forces in the Soviet Union from the death of Stalin to the end of the Khrushchev period. The author also traces its general evolution from 1917 on. For the later period he was able to interview high-ranking officers of the Soviet Forces who had left the USSR. Light is thrown on the dramatic clash of personalities and institutions, of interests and doctrinaire conceptions--the fight for power. This work will unquestionably establish itself as authoritative and indispensable for all those whose business it is to study Soviet military and political affairs. It will also be of profound interest to everyone alive to the human issues involved in the functioning of the machinery of Soviet Society.

Soviet Military Power, 1987 1987 Soviet Military Power 1987 reviews new development in the USSR's armed forces over the past year and

places these in the context of current doctrine and strategy. These developments again underscore that the USSR is building new generations of offensive strategic and theater nuclear forces, as well as conventional land, sea, and air forces and strategic defense forces, going far beyond legitimate requirements for defense.
