SS Great Britain 1843-1937 Brian Lavery 2012-06-01 The SS Bristol, a world first with new technologies was built in 1843, went around the world 37 times, retired 1889 and now resides back home in Bristol, England where today she is conserved. Now launched in the Haynes manual treatment, her innovative technology (screw propeller, iron hull and 1000hp steam engine) are all explained along with specially commissioned photographs of the ship's anatomy.

Forgetful Remembrance Guy Beiner 2018 Forgetful Remembrance examines the paradoxes of what actually happens when communities persistently endeavour to forget inconvenient events. The question of how a society attempts to obscure problematic historical episodes is addressed through a detailed case study grounded in the north-eastern counties of the Irish province of Ulster, where loyalist and unionist Protestants -- and in particular Presbyterians -- repeatedly tried to repress over two centuries discomfiting recollections of participation, alongside Catholics, in a republican rebellion in 1798. By exploring a rich variety of sources, Beiner makes it possible to closely follow the dynamics of social forgetting. His particular focus on vernacular historiography, rarely noted in official histories, reveals the tensions between professed oblivion in public and more subtle rituals of remembrance that facilitated muted traditions of forgetful remembrance, which were masked by a local culture of reticence and silencing. Throughout Forgetful Remembrance, comparative references demonstrate the wider relevance of the study of social forgetting in Northern Ireland to numerous other cases where troublesome memories have been concealed behind a veil of supposed oblivion.

Brunel Steven Brindle 2013-05-23 A celebration of the life and engineering achievements of Isambard Kingdom Brunel by two of the world's foremost authorities. In his lifetime, Isambard Kingdom Brunel towered over his profession. Today, he remains the most famous engineer in history, the epitome of the volcanic creative forces which brought about the Industrial Revolution - and brought modern society into being. Brunel's extraordinary talents were drawn out by some remarkable opportunities - above all his appointment as engineer to the new Great Western Railway at the age of 26 - but it was his nature to take nothing for granted, and to look at every project, whether it was the longest railway yet planned, or the largest ship ever imagined, from first principles. A hard taskmaster to those who served him, he ultimately sacrificed his own life to his work in his tragically early death at the age of 53. His legacy, though, is all around us, in the railways and bridges that he personally designed, and in his wider influence. This fascinating new book draws on Brunel's own diaries, letters and sketchbooks to understand his life, times, and work.

Ship, the Lady and the Lake Meriel Larken 2012-07-01 An extraordinary account of one woman's single-minded campaign to restore a Victorian steamship to her former glory and make her an Andean attraction Here is a vivid account of Meriel Larken's incredible quest to restore the Yavari steamship against the

odds—a ship that is now celebrating its 150 year anniversary in 2012. In 1862 the English-built Yavari was taken to bits and shipped to South America. In an epic logistical feat it was carried in thousands of pieces, by mule, up the Andes to Lake Titicaca, 12,500 feet above sea level, the world's highest navigable waterway. She was reconstructed and for more than a century plied her trade up and down the lake, but by 1985 she was a sad rotting hulk—until she was found by Larken, who led the quest to project to restore and preserve the ship. The oldest single screw iron passenger ship in the world, this nautical and engineering jewel is now a major Peruvian tourist attraction.

Churchill, Hitler, and "The Unnecessary War" Patrick J. Buchanan 2009-07-28 Were World Wars I and II inevitable? Were they necessary wars? Or were they products of calamitous failures of judgment? In this monumental and provocative history, Patrick Buchanan makes the case that, if not for the blunders of British statesmen—Winston Churchill first among them—the horrors of two world wars and the Holocaust might have been avoided and the British Empire might never have collapsed into ruins. Half a century of murderous oppression of scores of millions under the iron boot of Communist tyranny might never have happened, and Europe's central role in world affairs might have been sustained for many generations. Among the British and Churchillian errors were: • The secret decision of a tiny cabal in the inner Cabinet in 1906 to take Britain straight to war against Germany, should she invade France • The vengeful Treaty of Versailles that mutilated Germany, leaving her bitter, betrayed, and receptive to the appeal of Adolf Hitler • Britain's capitulation, at Churchill's urging, to American pressure to sever the Anglo-Japanese alliance, insulting and isolating Japan, pushing her onto the path of militarism and conquest • The greatest mistake in British history: the unsolicited war guarantee to Poland of March 1939, ensuring the Second World War Certain to create controversy and spirited argument, Churchill, Hitler, and “the Unnecessary War” is a grand and bold insight into the historic failures of judgment that ended centuries of European rule and guaranteed a future no one who lived in that vanished world could ever have envisioned.

Great Britain and the American Civil War Ephraim Douglass Adams 2020-01-09 This fascinating book discusses the role of the United Kingdom during the American Civil War. Officially, the UK stayed neutral throughout the war. They also legally recognised the belligerent status of the Confederate States of America (CSA), though never recognising it as a nation. Neither did the UK sign a treaty with it nor ever exchanged ambassadors. Over 90 percent of Confederate trade with Britain ended, causing a severe shortage of cotton. Private British blockade runners sent munitions and luxuries to Confederate ports in return for cotton and tobacco. Public opinion was divided over the war, with support for the Confederacy tending to emanate from the upper class while the middle and lower classes mostly favored the Union.

The Iron Ship Ewan Corlett 1990 Tell the story of the ss Great Britain and her revolutionary design and the current restoration being undertaken.

Engines of Empire Douglas R. Burgess Jr. 2016-05-04 In 1859, the S.S. Great Eastern departed from England on her maiden voyage. She was a remarkable wonder of the nineteenth century: an iron city longer than Trafalgar Square, taller than Big Ben's tower, heavier than Westminster Cathedral. Her paddles were the size of Ferris wheels; her decks could hold four thousand passengers bound for America, or ten thousand troops bound for the Raj. Yet she ended her days as a floating carnival before being

unceremoniously dismantled in 1889. Steamships like the Great Eastern occupied a singular place in the Victorian mind. Crossing oceans, ferrying tourists and troops alike, they became emblems of nationalism, modernity, and humankind's triumph over the cruel elements. Throughout the nineteenth century, the spectacle of a ship's launch was one of the most recognizable symbols of British social and technological progress. Yet this celebration of the power of the empire masked overconfidence and an almost religious veneration of technology. Equating steam with civilization had catastrophic consequences for subjugated peoples around the world. Engines of Empire tells the story of the complex relationship between Victorians and their wondrous steamships, following famous travelers like Mark Twain, Charles Dickens, and Jules Verne as well as ordinary spectators, tourists, and imperial administrators as they crossed oceans bound for the colonies. Rich with anecdotes and wry humor, it is a fascinating glimpse into a world where an empire felt powerful and anything seemed possible—if there was an engine behind it.

SS Great Britain Ephemera 1852 A receipt, approximately 21 x 9.5 cm (height x width), printed to one side only, completed by hand with details for Mr. Fredk. Banks of Seaforth for Passage for 102 Berth in the After Cabin of the G. Britain to Melbourne from Liverpool, folded, with minor soiling, red circular inkstamp and handwritten accession number of the Webster Collection to verso; together with a deck plan of the 'Great Britain Steam Ship', printed by Maclure, Macdonald and Macgregor, Liverpool, approximately 27 x 44 cm, showing plans of the Saloon and Main decks, folded, slightly soiled to folds, inkstamp of the Webster Collection to verso, and with a small group of newspaper cuttings (mostly from the Illustrated London News) relating to SS Great Britain. The SS Great Britain, designed by Isambard Kingdom Brunel and launched in 1843, was for nearly ten years the longest passenger ship in the world. In 1852 she was purchased by the shipping company Gibbs, Bright & Co., specifically to carry emigrants to Australia. Her first voyage to Australia began on 21 August 1852, arriving at Melbourne on 12 November. Among the passengers was Frederick Banks, a 27 year old Merchant's Bookkeeper, to whom this first class ticket was issued on the 14 August, 1852 - the ticket cost £73 10s/-. The receipt is signed, probably by a clerk, surname Bywater.

The Iron Ship K. M. McKinley 2015-05-26 Merchant, industrialist and explorer Trassan Kressind has an audacious plan - combining the might of magic and iron in the heart of a great ship to navigate an uncrossed ocean, seeking the city of the extinct Morfaan to uncover the secrets of their lost sciences. Ambition runs strongly in the Kressind family, and for each of Trassan's siblings fate beckons. Soldier Rel is banished to a vital frontier, bureaucrat Garten balances responsibility with family loyalty, sister Katriona is determined to carve herself a place in a world of men, outcast Guis struggles to contain the energies of his soul, while priest Aarin dabbles in forbidden sorcery. The world is in turmoil as new money brings new power, and the old social order crumbles. And as mankind's arts grow stronger, a terror from the ancient past awakens... This highly original fantasy depicts a unique world, where tired gods walk industrial streets and the tide's rise and fall is extreme enough to swamp continents. Magic collides with science to create a rich backdrop for intrigue and adventure in the opening book of this epic saga.

Starboard Nicola Skinner 2023-06-06 Nicola Skinner's inventive, funny, surprising prose once again tells an honest story of big emotions, making Starboard the perfect follow-up to the critically acclaimed Storm. Kirsten Bramble is too famous to have friends. That's what she tells herself, anyway—but with the end of her hit reality TV show barreling toward her, Kirsten's not sure she's ready to say goodbye to her lonely life of fame. Luckily—or unluckily—Kirsten can't help being plunged headfirst into a new adventure when she's dragged on a class trip to visit the SS Great Britain. Because somehow, the ancient ship can speak to her—and she wants Kirsten to be her new captain. The ship pulls out of the harbor with no sails and no working engine, and try as Kirsten might, she can't convince the ship to turn back until they find a way to help her finish her final quest. Kirsten doesn't feel like a captain—but along the way, she may just realize that the ending of an adventure, while scary, can be just as special as the beginning.

SS Great Britain Enthusiasts' Manual Brian Lavery 2018-02-25 Isambard Kingdom Brunel's SS Great Britain was a world first when she was launched at Bristol in 1843. This uniquely successful passenger ship design brought together the leading technologies of the day (screw propeller, iron hull and 1,000hp steam engine) to transform world travel. She was a successful ship and continued sailing until 1886, travelling 32 times around the world and nearly one million miles at sea. Great Britain was finally abandoned in the Falkland Islands in 1937, but in 1970 an ambitious salvage effort brought her home to Bristol, where today she is conserved.

SS Great Britain Wyn Davies 2012-07-25 The SS Great Britain, designed by Isambard Brunel, was the first ocean-going vessel to be screw-driven and built entirely of iron. When she was launched in 1843 she was twice the size of any previous ship and her revolutionary design heralded a complete break with traditional ship construction. As is the case for many historic ships, however, there is a surprising shortage of informative and well illustrated guides, for reference during a visit or for research by enthusiasts - ship modellers, naval buffs, historians or students. This new series redresses the gap. Written by experts and containing more than 200 specially commissioned photographs, each title takes the reader on a superbly illustrated tour of the ship, from bow to stern and deck by deck. Significant parts of the vessel for example, the propeller, steering gear, engine and accommodation are given detailed coverage both in words and pictures, so that the reader has at hand the most complete visual record and explanation of the ship that exists. In addition, the importance of the ship, both in her own time and now as a museum vessel, is explained, while her design and build, and her career prior to restoration and exhibition are all described. No other books offer such superb visual impact and detailed information as the Seaforth Historic Ship Series a truly groundbreaking concept bringing the ships of our past vividly to life.

HMS Gannet William Mowll 2018-04-30 HMS Gannet, beautifully restored today at Chatham Historic Dockyard, is a fine example of the small colonial schooners that were built and deployed in the second half of the nineteenth century to police Britain's great empire and enforce the peace of Pax Britannica. Launched at Sheerness in 1878 with her white Mediterranean livery and elegant clipper bow, she was the epitome of the colonial gunboat. In this new book by the well-known ship modeller Will Mowll, the design and history of *Gannet* is outlined before the author takes the reader on a detailed photographic step-by-step exposition of the building of his 1/48 scale model of the ship. A particular feature of the model is the inclusion of a static representation of the 2-cylinder compound steam engine with its three cylindrical boilers. Exquisitely detailed, with even the bunkered coal beautifully modelled, all the machinery is made visible by means of the removable deck. The author has therefore reconstructed a major feature of the ship which is no longer extant on the prototype at Chatham. All the information that a ship modeller might need is included here hull construction and the coppering of the ship's bottom, the making of the ship's steam propulsion systems, the decks and decking, armament, steering gear, mast and yards and rigging, and even the furniture in the wardroom. No part of the ship is left hidden. Inspiring with the sheer quality of his workmanship, the author has brought beautifully to life another of Britain's great museum ships.

The Voyages of the Great Britain Nicholas Fogg 2002 Built of iron, powered by steam and driven by the screw propeller, Brunel's Great Britain was a radically new type of ship when she first sailed in 1845. Designed to carry passengers in unprecedented comfort, and powerful enough to keep to pre-arranged schedules, she was the prototype of the modern liner. Although, like many of Brunel's projects, she was unsuccessful in her intended role as that of a North Atlantic packet ship, Great Britain enjoyed a long and highly successful career once switched to the Australia run. During more than thirty years the ship carried thousands of passengers, many of them emigrants seeking a new life 'Down Under.'
