In Search of More Effective Mathematics Education Ian Westbury 1994 This volume presents a set of studies that explore significant questions about mathematics teaching and learning, and illustrate

new methodologies for the analysis of new questions about mathematics education. The data from the Second International Mathematical Study (SIMS) is the starting point for all of the material in this work. SIMS was one of the largest and most comprehensive data-collection effort on mathematics teaching and learning ever undertaken. Because of its scale, comparative cross-cultural perspective, conceptualization and design, its data offer an indispensable beginning point for the exploration of many of the fundamental questions that circle around mathematics teaching and learning, not only internationally, but in the United States as well.

The Effect of a Literature-based Program Integrated Into Literacy and Science Instruction on Achievement, Use, and Attitudes Toward Literacy and Science

Lesley Mandel Morrow 1995

History Textbooks American Textbook Council 1994 Based on expert review and research, this book provides an

innovative standard and guide to social studies textbooks used in kindergarten through 12th grade classrooms for content, style, and design. The standards provide a foundation for individuals to select satisfactory textbooks and to help educators and school boards in the adoption of instructional materials. Chapter 1 addresses the problems of textbook content and style. Chapter 2 discusses the vast business of social studies publishing and the increased complexity of textbook packaging with the movement away from state-level adoption of textbooks. Chapter 3 focuses on the content of social studies textbooks with a comparison of past and present textbooks, a discussion of revisionism and reality, and a look at religion in textbooks. Chapter 4 examines the style and story of textbooks and finds that although the content of past textbooks may be flawed, the prose is superior to recent textbooks. Ideas on narrative, readability, vocabulary, instructional

design, history, and style provide ways for textbooks to improve. Chapter 5 addresses the issue of format and proposes clarity and simplicity in technical design of books. Chapter 6 provides an outline to review textbooks for content and style and instructional activities and teacher guidance materials for usefulness. Chapter 7 includes an annotated list of the major U.S. and world history textbooks. (CK)

Literacy Strategies for Gifted and Accelerated Readers Vicki Caruana 2020-01-08 Gifted and accelerated readers are often not a part of reading instruction in a traditional or inclusive classroom. Their needs go unattended in favor of those who struggle with basic reading and foundational skills. All children should have the opportunity to grow in their knowledge and skills in literacy. This book provides teachers who have one or more gifted/accelerated or those who are "keenly interested" students in their class ways in which they can differentiate

reading instruction that is equitable. Literacy Strategies for Gifted and Accelerated Readers provides educators with practical, research-based strategies and advice to address the unique needs of gifted readers. Attention to required specially designed instruction that aligns to both the content standards and the NAGC PreK-12 Gifted Programming Standards ensures that gifted readers make progress through literacy instruction. This book provides insight and expertise to general education teachers, teachers of the gifted, special education teachers, homeschool educators, professional developers, and higher education faculty.

Textbooks in a Multicultural Society Linda Cathryn Everstz 1992

Annual Summary of Investigations Relating to Reading 1992

Social Trends in American Life Peter V. Marsden 2012-08-26 Changes in American social attitudes and behaviors since the 1970s

Social Trends in American Life assembles a team of leading researchers to provide unparalleled insight into how American social attitudes and behaviors have changed since the 1970s. Drawing on the General Social Survey—a social science project that has tracked demographic and attitudinal trends in the United States since 1972—it offers a window into diverse facets of American life, from intergroup relations to political views and orientations, social affiliations, and perceived well-being. Among the book's many important findings are the greater willingness of ordinary Americans to accord rights of free expression to unpopular groups, to endorse formal racial equality, and to accept nontraditional roles for women in the workplace, politics, and the family. Some, but not all, signs indicate that political conservatism has grown, while a few suggest that Republicans and Democrats are more polarized. Some forms of social connectedness such as neighboring have declined, as

has confidence in government, while participation in organized religion has softened. Despite rising standards of living, American happiness levels have changed little, though financial and employment insecurity has risen over three decades. Social Trends in American Life provides an invaluable perspective on how Americans view their lives and their society, and on how these views have changed over the last two generations.

Virginia English Bulletin

Readability Revisited Jeanne Sternlicht Chall 1995 "In Readability Revisited, Dr. Jeanne Chall and the late Dr. Edgar Dale present an introduction and historical overview of the original Dale-Chall Readability Formula, its purposes and uses over nearly five decades, and its relation to other measures of readability. The second chapter of Readability Revisited presents the new, revised Dale-Chall Readability Formula which is based on a new set of criterion

passages, an updated familiar word list, and better rules for measuring the two factors of word familiarity and sentence length. The authors have also simplified the instructions and computations required to apply the formula." "Three worksheets included in the book combine the revised Dale-Chall formula with assessments of the cognitive and structural elements of the written material, the characteristics of the target readers, and their purpose for reading the material. Together, these provide a new and powerful tool for assessing the reading difficulty of written materials."

Should Textbooks Challenge Students? Jeanne Sternlicht Chall 1991-01-01

Creating Reading Instruction for All Children Thomas G.

Gunning 1996 This book will not tell you how to teach reading. Teaching reading is in large measure a matter of making choices: Should you use basal readers or children's books, or both? Should you teach children to read whole words or to sound out words letter by letter, or both? Should you have three reading groups or four, or no groups? There are no right answers to these questions. The answers depend on your personal philosophy, your interpretation of the research, the level at which you are teaching, the kinds of students you are teaching, community preferences, and the nature of your school or school district's reading program.

Reading Difficulties Florence G. Roswell 1999

Our Schools and Our Future

Paul E. Peterson 2003-02

"When A nation at risk was

published 20 years ago, it was seen as something of the Peyton Place of education reports: it stunned the establishment, readers threw up their hands and proclaimed themselves shocked by it, but no one could tear themselves away from reading it. Now, on the 20th anniversary of the original report, the Koret Task Force tells a no less compelling story."--Quatrième de couverture.

The Routledge Handbook of Chinese Second Language Acquisition

Chuanren Ke
2018-03-29 The Routledge Handbook of Chinese Second Language Acquisition is the first reference work of its kind. The handbook contains twenty contributions from leading experts in the field of Chinese SLA, covering a wide range of topics such as social contexts, linguistic perspectives, skill learning, individual differences and learning settings and testing. Each chapter covers historical perspectives, core issues and key findings, research approaches, pedagogical implications,

future research direction and additional references. The Routledge Handbook of Chinese Second Language Acquisition is an essential reference for Chinese language teachers and researchers in Chinese applied linguistics and second language acquisition. Teaching Children to be Literate Anthony V. Manzo 1995 Prepares teachers for careers in literacy education, emphasizing the role of literacy education in promoting the spirit of democratic life. Chapters on the reading process, teacher empowerment, teaching approaches, higher order literacy, content area reading, and literacy provisions for children wit

The Dynamics of Language Program Direction David P. Benseler 1993 This collection papers begins with "Introduction: The Dynamics of Successful Leadership in Foreign Language Programs," then features the following: "The Undergraduate Program:

Autonomy and Empowerment" (Wilga M. Rivers); "ta Supervision: Are We Preparing a Future Professoriate?" (Cathy Pons); "Applied Scholarship in Foreign Languages: a Program of Study in Professional Development" (Katherine Arens); "The Dynamics and Visibility of Foreign Language Programs: a Five-Year Survey of the 'Chronicle of Higher Education'" (Francis Lide); "ta Programs; The Fit between Foreign Language Teacher Preparation and Institutional Needs" (Lynn Carbon Gorell and Jorge Cubillos); "The 'Culture and Commerce' of the Foreign Language Textbook: a Preliminary Investigation" (L. Kathy Heilenman and Erwin Tschirner); "The Dynamics of Placement Testing: Implications for Articulation and Program Revision" (Diane W. Birckbichler, Kathryn A. Corl, and Craig Deville); "Identifying and Instructing At-Risk Foreign Language Learners in College" (Richard L. Sparks and Leonore Ganschow); "After the Classroom Visit: a Model for

the Preparation of Peer Supervisors" (Robert L. Davis and Joan F. Turner); (Papers contain references.) (Sm). *Literacy and Education* Joseph Shimron 1996 The chapters in this volume centre on a need to reassess the possibilities of fostering literacy within the public education system. Some sections are oriented toward theoretical issues in the psychology of reading, whereas other are oriented toward learning and education.

Notable American Women

Susan Ware 2004 This latest volume brings the project up to date, with entries on almost 500 women whose death dates fall between 1976 and 1999. You will find here stars of the golden ages of radio, film, dance, and television; scientists and scholars; civil rights activists and religious leaders; Native American craftspeople and world-renowned artists. For each subject, the volume offers a biographical essay by a distinguished authority that integrates the woman's personal life with her professional achievements set

in the context of larger historical developments.

Qualitative Assessment of Text Difficulty

Jeanne Sternlicht Chall 1996 Teaches a revolutionary approach to making judgements about the difficulty of a reading selection.

Occupied Reading

Alan A. Block 2023-05-31 Today's growing national concern about education centers on the paramount importance of teaching reading and writing. This volume offers a rigorous examination of reading and the pedagogy of reading critically. The book examines the crucial role of reading in the education of the child for the year 2000 and explores the history of reading and readers in America while surveying the attendant literacy debates. The author examines the historical progress of American reading instruction, demonstrating that how one is taught to read not only determines what one will read, but also what is permissible to read, and how pedagogies of reading define reading publics. An important chapter focuses on reading as a

process of identity construction that creates not only a text but shapes the person who reads that text. The book also describes reading as a psychological process in which the creative act of manipulating the text produces the self and the world. A final chapter discusses reading as the center of the educational system and examines methodologies. An index is provided.

Losing Our Language Sandra Stotsky 1999 A hard-hitting, well-researched expose showing why multiculturalism as the guiding philosophy in the classroom is damaging to all children--and to minority children in particular. Index.

The Creative Problem

Solving Kit

2006-04 For Bright Students! The student section of the book helps gifted kids master the strategies they need to be happy and successful by actively involving them in understanding the problems they face and in using the strategies needed to cope with them successfully. Topics include separating facts

from feelings, stress, peer pressure, being introspective, dealing with authority, social issues, depression, and much more. Written just for students, this section provides thought-provoking activities that lead to coping skills.

Human Development Across the Life Span Ralph L.

Mosher 1999-07-30 This new collection of writings describes

the recent thinking of psychologists and educators regarding interactive development across the spectrum of competency domains within the individual. Significant research efforts emphasizing innovations in qualitative methodology, pedagogical refinements, and therapeutic interventions—both remedial and prophylactic—are presented to illustrate recent applications of current life-span development theorizing. The volume begins with a section devoted to theory and practice in educating for human development; this is followed by sections examining counseling for development, and educating for morality, religion, and citizenship.
