Old Southern Apples Creighton Lee Calhoun 2011-01-20 A book that became an instant classic when it first appeared in 1995, Old Southern Apples is an indispensable reference for fruit lovers everywhere, especially those who live in the southern United States. Out of print for several years, this newly revised and expanded edition now features descriptions of some 1,800 apple varieties that either originated in the South or were widely grown there before 1928. Author Lee Calhoun is one of the foremost figures in apple conservation in America. This masterwork reflects his knowledge and personal experience over more than thirty years, as he sought out and grew hundreds of classic apples, including both legendary varieties (like Nickajack and Magnum Bonum) and little-known ones (like Buff and Cullasaga). Representing our common orchard heritage, many of these apples are today at risk of disappearing from our national table. Illustrated with more than 120 color images of classic apples from the National Agricultural Library's collection of watercolor paintings, Old Southern Apples is a fascinating and beautiful reference and gift book. In addition to A-to-Z descriptions

of apple varieties, both extant and extinct, Calhoun provides a brief history of apple culture in the South, and includes practical information on growing apples and on their traditional uses.

Preliminary Notes on the Seedling Apples of Maine, 1907 Welton Marks Munson 2017-10-27 Excerpt from Preliminary Notes on the Seedling Apples of Maine, 1907: This Bulletin Contains a History and Description

of the More Important of the Seedling Apples Originating in Maine The catalog of Maine seedlings, though necessarily incomplete, includes all of the best known sorts, and some which, though listed by Downing, Cole and others, have been discarded. The fact that a variety has been called to public attention in fruit lists and pomological manuals, is deemed sufficient reason for consideration at this time. Doubtless many sorts have been omitted, and it is hoped that these, with other corrections, may be included in a subsequent and more complete list. Besides the varieties above mentioned, are several more or less obscure ones, listed at different times by Downing, Thomas, Cole, and others, and mentioned in reports of the Maine Pomological Society. Many of these were Simply of local importance and were never generally propagated. Others were more or less widely distributed about 50 years ago, but have been superseded by the sorts more commonly grown in the New York nurseries. Among these varieties may be named: Blake, Chase Seedling, Childs, Dayton, Kennebec Russet, Lambert, Peachblow, Rock wood, Smith Favorite, Table Greening. As these are now wholly, or practically extinct, descriptions are omitted. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. The Holistic Orchard Michael Phillips 2012-01-10 Many people want to grow fruit on a small scale but lack the insight to be successful orchardists. Growing tree fruits and berries is something virtually anyone with space and passionate desire can do - given wise guidance and a personal commitment to observe the teachings of the trees. A holistic grower knows that producing fruit is not about manipulating nature but more importantly, fostering nature. Orchardng then becomes a fascinating adventure sure to provide your family with all sorts of mouth-watering fruit. The Holistic Orchard demystifies the basic skills everybody should know about the inner-workings of the orchard ecosystem, as well as orchard design, soil biology, and organic health management. Detailed insights on grafting, planting, pruning, and choosing the right varieties for your climate are also included, along with

a step-by-step instructional calendar to guide growers through the entire orchard year. The extensive profiles of pome fruits (apples, pears, asian pears, quinces), stone fruits (cherries, peaches, nectarines, apricots, plums), and berries (raspberries, blackberries, blueberries, gooseberries, currants, and elderberries) will quickly have you savoring the prospects. Phillips completely changed the conversation about healthy orcharding with his first bestselling book, *The Apple Grower*, and now he takes that dialogue even further, drawing connections between home orcharding and permaculture; the importance of native pollinators; the world of understory plantings with shade-tolerant berry bushes and other insectary plants; detailed information on cover crops and biodiversity; and the newest research on safe, homegrown solutions to pest and disease challenges. All along the way, Phillips' expertise and enthusiasm for healthy growing shines through, as does his ability to put the usual horticultural facts into an integrated ecology perspective. This book will inspire beginners as well as provide deeper answers for experienced fruit growers looking for scientific organic approaches. Exciting times lie ahead for those who now have every reason in the world to confidently plant that very first fruit tree!

The Apples of Maine George Albert Stilphen 1993 This exhaustive & definitive work sets out in the greatest detail the historical, physical &

cultural characteristics of the more than 700 varieties of apples that once grew in the state of Maine, over 200 of which were of Maine origin. Perhaps the greatest value of this book, however, lies in the copious reference notes to each variety, comprising all known American sources prior to 1920. Further, there is a long chapter dealing with the history of Maine pomology since 1629 & another on the discovery of Maine apples never written about. Included also are numerous appendices & several indices to enhance the utility of the work to the researcher.

Nevertheless, due to the easily readable style of the text, this book is of the utmost value not only to the pomological historian & variety collector, but to anyone who desires to read of a special way of rural life that is, unfortunately, gone forever. Available in an elegant, hard bound, numbered & autographed edition only from the author: George A. Stilphen, R.R. 1, Box 1347, Bolster's Mills/Harrison, ME 04040. (207) 743-9420.
