Combining careful local research with wide-ranging theory Lieberman argues that over a thousand years, each of mainland Southeast Asia's great lowland corridors experienced a pattern of accelerating integration punctuated by recurrent collapse. These trajectories were synchronized not only between corridors, but most curiously, between the mainland as a whole, much of Europe, and other sectors of Eurasia. He describes in detail the nature of mainland consolidation - which was simultaneously territorial, religious, ethnic, and commercial - and dissects the mix of endogenous and external factors responsible. Here, then, is a fundamentally original analysis not only of

Southeast Asia, but of the pre-modern world. *Changing Forests* Catherine M. Tucker 2008-03-13 Drawing on ethnographic and archival research, this book explores how the indigenous Lenca community of La Campa, Honduras, has conserved and transformed their communal forests through the experiences of colonialism, opposition to state-controlled logging, and the recent adoption of export-oriented coffee production. The book merges political ecology, collective-action theories, and institutional analysis to study how the people and forests have changed through various transitions.

*Technofuturos* Nancy Raquel Mirabal 2007-04-19 *Technofuturos* offers a critical and innovative exploration of the forms of representation found in Latina/o studies. The editors, Nancy Raquel Mirabal and Agustín La-Montes, challenge conventional notions of Latina/o identities, histories, and cultures by historicizing and differentiating the multiple discourses of Latinidad. The essays examine the temporality and spatiality of socio-historical processes, the multiple and varied constellations of power, and the complicated geographies of desire. By analyzing the discursive, performative, and aesthetic dimensions of knowledge, this book contests and reconstructs Latina/o studies. *Technofuturos* is a captivating and sophisticated read that will appeal to scholars of Latina/o studies and those interested in postcolonial critique.

**Comparative Cultural Studies and Latin**

**America** Sophia A. McClennen 2004 The genesis of Comparative Cultural Studies and Latin America stems from the contributors' conviction that, given its vitality and excellence, Latin American literature deserves a more prominent place in comparative literature publications, curricula, and disciplinary discussions. The editors introduce the volume by first arguing that there still exists, in some quarters, a lingering bias against literature written in Spanish and Portuguese. Secondly, the authors assert that by embracing Latin American literature and culture more enthusiastically, comparative literature would find itself reinvigorated, placed into productive discourse with a host of issues, languages, literatures, and cultures that have too long been paid scant academic attention. Following an introduction by the editors, the volume contains papers by Gene H. Bell-Villada on the question of canon, by Gordon Brotherston and Lúcia de Sá on the First Peoples of the Americas and their literature, by Elizabeth Coonrod Martínez on the Latin American novel of the 1920s, by Román de la Campa on Latin American Studies, by Earl E. Fitz on Spanish American and Brazilian literature, by Roberto González Echevarría on Latin American and comparative literature, by Sophia A. McClennen on comparative literature and Latin American Studies, by Alberto Moreiras on Borges, by Julio Ortega on the critical debate about Latin American cultural studies, by Christina Marie Tourino on Cuban Americas in New York City, by Mario J. Valdés on the comparative history of literary cultures in Latin America, and by Lois Parkinson Zamora on comparative literature and globalization. The volume also contains a bibliography of scholarship in comparative Latin American culture and literature and biographical abstracts of the contributors to the volume.

world religions is now available in a more concise version. Many of the features of Introduction to World Religions are retained in this volume but with focus on the religious traditions themselves. It continues to provide broad coverage of diverse religions, including indigenous religions, Hinduism, Buddhism, Jainism, Judaism, Christianity, Islam, Sikhism, and Chinese, Korean, and Japanese religions. The user-friendly content is enhanced by charts of religious festivals, historic timelines, updated maps of the world's religions, and a useful glossary. Both historical overviews and modern perspectives for each religion are included. This edition includes several updates made to the new third edition, including a new design, a new section on women and religion, and a newly revised section on religions in today's world.

Chicanas/Chicanos at the Crossroads David Maciel 1996-03 Dubbed the "decade of the Hispanic," the 1980s was instead a period of retrenchment for Chicanas/os as they continued to confront many of the problems and issues of earlier years in the face of a more conservative political environment. Following a substantial increase in activism in the early 1990s, Chicana/o scholars are now prepared to take stock of the Chicano Movement's accomplishments and shortcomings--and the challenges it yet faces--on the eve of a new millennium. Chicanas/Chicanos at the Crossroads is a state-of-the-art assessment of the most significant developments in the conditions, fortunes, and experiences of Chicanas/os since the late seventies, with an emphasis on the years after 1980, which have thus far received little scholarly attention. Ten essays by leading Chicana and Chicano scholars on economic, social, educational, and political trends in Chicana/o life examine such issues as the rapid population growth of Chicanas/os and other Latinos; the ascendancy of Reaganomics and the turn to the right of American politics; the rise of anti-immigrant sentiment; the

launching of new initiatives by the Mexican government toward the Chicano community; and the emergence of a new generation of political activists. The authors have been drawn from a broad array of disciplines, ranging from economics to women's studies, in order to offer a multidisciplinary perspective on Chicana/o developments in the contemporary era. The inclusion of authors from different regions of the United States and from divergent backgrounds enhances the broad perspective of the volume. The editors offer this anthology with the intent of providing timely and useful insights and stimulating reflection and scholarship on a diverse and complex population. A testament to three decades of intense social struggle, *Chicanas/Chicanos at the Crossroads* is ample evidence that the legacy of the Movimiento is alive and well. Contents Part One: Demographic and Economic Trends Among Chicanas/os 1. Demographic Trends in the Chicano Population: Policy Implications for the Twenty First Century, Susan Gonzalez-Baker 2. Mexican Immigration in the 1980s and Beyond: Implications for Chicanos/as, Leo R. Chavez and Rebecca Martinez 3. Chicanas/os in the Economy: Issues and Challenges Since 1970, Refugio Rochin and Adela de la Torre Part Two: Chicano Politics: Trajectories and Consequences 4. **Trusting Enemies** Nicholas J. Wheeler  
 2018-03-09 How can two states with enemy relations transform their relationship? Nicholas Wheeler argues that the discipline of International Relations has not done a good job of answering this question because its focus has been on the state and the individual levels of analysis. In this ground-breaking book, he argues for the importance of a new level of analysis in trust research the interpersonal relationships between state leaders. In doing so, he makes two key contributions. Firstly, developing a new theory of interpersonal trust that can be applied to the international level, and secondly, showing how this theory contributes to the literature on signalling in IR. The theory of interpersonal trust developed in the book provides a novel response to the central problem identified by signalling theory in IR: whether the receivers of signals interpret them in the way intended by their senders. The author argues that, in fact, trust between two leaders is causally prior to the accurate interpretation of the signals they send with the aim of communicating peaceful intent. Trust, therefore, does away with the problem of the ambiguity of signal interpretation. He goes on to examine exactly how a new relationship of trust emerges between two leaders who represent states with enemy relations: through face-to-face interaction and the crucial process of bonding between them that this makes possible. This powerful new theory of interpersonal trust is applied to three cases: the personal interactions between US and Soviet leaders Ronald Reagan and Mikhail Gorbachev in ending the Cold War;

the face-to-face interactions between Indian Prime Minister Atal Bihari Vajpayee and Pakistani Prime Minister Nawaz Sharif in reducing conflict between India and Pakistan in 1998-1999; and the interactions in 2009-10 between Barack Obama and Ayatollah Ali Khamenei that failed to achieve a breakthrough in US-Iran nuclear relations.

**Greek Slavery** Deborah Kamen 2023-06-19 Slavery is attested throughout ancient Greek history and all over the Greek world. Unsurprisingly, then, scholarship on Greek slavery has proliferated in the past twenty-five or so years, making a holistic synthesis of such work especially desirable. This book offers a state-of-the-art guide to research on this subject, surveying recent scholarly trends and controversies and suggesting future directions for research. Topics include regional variation in slave systems; the economics of slavery; the treatment of enslaved people; sex and gender; agency, resistance, and revolt; manumission; and representations, metaphors, and legacies of Greek slavery. Readers, including those interested in slavery of other time periods, will find this book an essential resource in learning about key issues in Greek slavery studies or in pursuing their own research.

**Jose Marti: An Introduction** O. Montero 2004-04-16 Jose Marti, Cuban national hero, was one of Latin America's most influential literary and political figures. There is currently no introductory overview to his complex body of works. Jose Marti: An Introduction offers such an introduction to Marti's most pertinent, enduring ideas, exploring his writing on race, gender, the relationship between Cuba and the US, and issues of displacement and bilingualism.

The writing is accessible on the undergraduate level, yet Montero does not oversimplify ambiguities and contradictions of Marti's work and life.

**Silk for Silver** Anh Tuán HoÁng 2007 This book focuses on the political and commercial relations between the Dutch East India Company (VOC) and the Vietnamese kingdom of Tonkin from 1637 until the beginning of the eighteenth century. The VOC exported silk and silk piece-goods from Tonkin to Japan. The author focuses on various aspects of the mutual relationship between the VOC and Tonkin, and how this fitted into the larger picture of the intra-Asian trade. The book reveals the vicissitudes in political relations, and the varying trends in the VOC's import (silver and copper) and export (silk, ceramics, musk, and gold). While examining a great deal of detailed archival materials, the author evaluates Dutch influence on Tonkin's feudal society and economy. The book also offers a fascinating sketch of how the Vietnamese trading elite maximized their own profits by dealing with various western tradesmen, including the English and French.

**Physics of Long-Range Interacting Systems** A. Campa 2014-08-28 This book deals with an

important class of many-body systems: those where the interaction potential decays slowly for large inter-particle distances; in particular, systems where the decay is slower than the inverse inter-particle distance raised to the dimension of the embedding space. Gravitational and Coulomb interactions are the most prominent examples, however it has become clear that long-range interactions are more common than previously thought. A satisfactory understanding of properties, generally considered as oddities only a couple of decades ago, has now been reached: ensemble inequivalence, negative specific heat, negative susceptibility, ergodicity breaking, out-of-equilibrium quasi-stationary-states, anomalous diffusion. The book, intended for Master and PhD students, tries to gradually acquaint the reader with the subject. The first two parts describe the theoretical and computational instruments needed to address the study of both equilibrium and dynamical properties of systems subject to long-range forces. The third part of the book is devoted to applications of such techniques to the most relevant examples of long-range systems.

Memory and the Archival Turn in Caribbean Literature and Culture Marta Fernández Campa 2023-04-15 This book discusses an archival turn in the work of contemporary Caribbean writers and visual artists across linguistic locations and whose work engages critically with various historical narratives and colonial and postcolonial records. This refiguration opens a critical space and retells stories and histories previously occluded in/by those records, and in spaces of the public sphere. Through poetics and aesthetics of fragmentation largely influenced by music and popular culture, their work encourages contrapuntal ways of (re)thinking histories; ways that interrogate the influence of colonial narratives in processes of silencing but also centre the knowledge found in oral histories and other forms of artistic archives outside official repositories. Discussing literature and selected artwork by artists from Britain, Cuba, the Dominican Republic, Haiti, Puerto Rico, and Trinidad and Tobago, *Memory and the Archival*

*Turn in Caribbean Literature and Culture* demonstrates the historiographical significance of artistic and cultural production.

*The Nyingma School of Tibetan Buddhism* Dudjom 2012-07-23 Written by a great modern Nyingma master, Dudjom Rinpoche's *The Nyingma School of Tibetan Buddhism* covers in detail and depth both the fundamental teachings and the history of Tibetan Buddhism's oldest school. This, the first English translation of His Holiness' masterwork, constitutes the most complete work of its type in the West. An absolute treasure for students of the tradition, it is also an indispensable reference for anyone with an interest in Buddhism. The book includes chronologies and glossaries that elucidate Buddhist doctrine, and it provides fascinating insights into the Buddhist history of Tibet. Two treatises form the present volume, namely the *Fundamentals of the Nyingma School* and the *History of the Nyingma School*. Among the most widely read of all His Holiness Dudjom Rinpoche's works, these treatises were composed during the years immediately following his arrival in India as a refugee. His intention in writing them was to preserve the precise structure of the Nyingma philosophical view within its own historical and cultural context. This is the first time this text has been available in a trade edition. Beautifully presented, this single-volume edition represents a truly wonderful gift, and features illustrations in black and white and in color, plus maps, bibliographic information, and useful annotations.

Forest, Field, and Fallow Antoinette M.G.A. WinklerPrins 2021-01-12 This volume aims to present the essential work of geographer and historical ecologist William M. Denevan to explain the impact and influence his thinking had on the conceptual advancement not only in his own discipline, but in a range of related disciplines such as anthropology, archaeology, and environmental history. The book is organized around eight themes, demonstrating Denevan's early and profound insights on topics that remain of current relevance today, and the scholarly impact his writing had on subsequent scholarship. The book is unique because it offers commentary from active scholars who address the impacts of Prof. Denevan's thinking and

work on contemporary environmental and ecological issues, with a focus on several groundbreaking themes (e.g. historical demography, agricultural landforms, cultural plant geography, human environmental impacts, indigenous agro-ecology, tropical agriculture, livestock and landscape, and synthetic contributions). This book will be of interest to a range of scholars in geography, anthropology, archaeology, history, and ecology, as well as to environmental managers and practitioners, especially those working for non-profit organizations and government organizations tasked with finding ways to adapt to global environmental change.

**The Cambridge History of Southeast Asia: From early times to c. 1800** Nicholas Tarling 1992 The Cambridge History of Southeast Asia is a multi-authored treatment of the whole of mainland and island Southeast Asia from Burma to Indonesia. Unlike other histories of the region, it is not divided on a country-by-country basis and is not structured purely chronologically, but rather takes a thematic and regional approach to Southeast Asia's history, aiming to present the current state of historical research on Southeast Asia as well as stimulating further thought and investigation.-- Publisher description.

*The Travels and Adventures of Serendipity* Robert K. Merton 2011-11-28 From the names of cruise lines and bookstores to an Australian ranch and a nudist camp outside of Atlanta, the word serendipity--that happy blend of wisdom and luck by which something is discovered not quite by accident--is today ubiquitous. This book traces the word's eventful history from its 1754 coinage into the twentieth century--chronicling along the way much of what we now call the natural and social sciences. The book charts where the term went, with whom it resided, and how it fared. We cross oceans and academic specialties and meet those people, both famous and now obscure, who have used and abused serendipity. We encounter a linguistic sage, walk down the illustrious halls of the Harvard Medical School, attend the (serendipitous) birth of penicillin, and meet someone who "manages serendipity" for the U.S. Navy. The story of

serendipity is fascinating; that of *The Travels and Adventures of Serendipity*, equally so. Written in the 1950s by already-eminent sociologist Robert Merton and Elinor Barber, the book--though occasionally and most tantalizingly cited--was intentionally never published. This is all the more curious because it so remarkably anticipated subsequent battles over research and funding--many of which centered on the role of serendipity in science. Finally, shortly after his ninety-first birthday, following Barber's death and preceding his own by but a little, Merton agreed to expand and publish this major work. Beautifully written, the book is permeated by the prodigious intellectual curiosity and generosity that characterized Merton's influential *On the Shoulders of Giants*.

Absolutely entertaining as the history of a word, the book is also tremendously important to all who value the miracle of intellectual discovery. It represents Merton's lifelong protest against that rhetoric of science that defines discovery as anything other than a messy blend of inspiration, perspiration, error, and happy chance--anything other than serendipity.

**Research Methods in Critical Security Studies** Mark B. Salter 2023-05-12 This textbook surveys new and emergent methods for doing research in critical security studies, filling a gap in the literature. The second edition has been revised and updated. This textbook is a practical guide to research design in this increasingly established field. Arguing for serious attention to questions of research design and method, the book develops accessible scholarly overviews of key methods used across critical security studies, such as ethnography, discourse analysis, materiality, and corporeal methods. It draws on prominent examples of each method's objects of analysis, relevant data, and forms of data collection. The book's defining feature is the collection of diverse accounts of research design from scholars working within each method, each of which is a clear and honest recounting of a specific project's design and development. This second edition is extensively

revised and expanded. Its 33 contributors reflect the sheer diversity of critical security studies today, representing various career stages, scholarly interests, and identities. This book is systematic in its approach to research design but keeps a reflexive and pluralist approach to the question of methods and how they can be used. The second edition has a new forward-looking conclusion examining future research trends and challenges for the field. This book will be essential reading for upper-level students and researchers in the field of critical security studies, and of much interest to students in International Relations and across the social sciences.

*Still Think Robots Can't Do Your Job?* Riccardo Campa 2018-01-01 Is Artificial Intelligence qualitatively different from other means of economizing the use of labor? Are we on the edge of a jobless society? If yes, are we ready for it? These are a few of the questions discussed in this collection of academic works. This book traces a brief history of the concept of technological unemployment; proposes a short-term scenario analysis concerning the relations between automation, education, and unemployment; analyzes the most recent literature on social robotics; examines the possible futures generated by the development of intelligent machines; shows the relation between automation and unemployment in an Italian case study; considers the impact if machines become effective pursuers of knowledge or even conscious; and addresses the role of serendipity in the development of science and technology.
