British Music and the French Revolution Paul F. Rice 2010-04-16

British Music and the French Revolution investigates the nature of British musical responses to the cataclysmic political events unfolding in France during the period of 1789-1795, a time when republican and royalist agendas were in conflict in both nations. While the parallel demands for social and political change resulted from different stimuli, and were resolved very differently, the 1790s proved to be a defining period for each country. In Britain, the combination of a protracted period of Tory conservatism, and the strong spirit of patriotism which swept the nation, had a profound influence on the arts. There was an outpouring of concert and theatrical music dealing with the French Revolution and the subsequent war with France. While patriotic songs might be expected when a country is at war, the number of recreations on the London stages of events taking place on the Continent may surprise. Initially, such topical subjects were restricted to the summer or "minor" theatres; however, government restrictions were relaxed after 1793, giving Londoners the opportunity to see topical theatre in the royal or "patent" theatres, as well. The resulting repertoire of plays and recreations (often propagandist in nature) made considerable use of music, and those performed in the "minor" theatres were all-sung. Consequently, there exists a large repertoire of music which has been little studied. British Music and the French Revolution investigates this

repertoire within a social and political context. Initial chapters examine the historical relationship between France and Britain from a musical perspective, the powerful symbols of national identity in both countries, and the complex laws that governed commercial theatres in London. Thereafter, the materials are presented in a chronological fashion, starting with the fall of the Bastille in 1789, and the Fête de la Fédération in 1790. The period of the Captivity was one of growing tension and fear in both France and Britain as war became an ever-increasing threat between the two nations. Two subsequent chapters examine the war years of 1793 until first half of 1795. The choice of a five-year period allows the reader to follow British musical reactions to the fall of the Bastille and subsequent events up to the rise of Napoléon. *Etude* 1910 Includes music.

Concert Music of the Twentieth Century Mark A. Radice 2003 Concert Music of the Twentieth Century is about "concert music"--music for contemplation rather than for atmosphere. The repertoire discussed in these pages was written by composers with something important to say and with skills to do so. Many of the works discussed tie in with a long-standing, Western European tradition of art music, but an equal voice is given to culturally and ethnically diverse composers active during the past several decades. Radice provides data about the pieces, the composers who wrote them, and the contexts in which they originated. Our understanding and evaluation of music is a dynamic process and one that is subject to change. Music only has meaning within its social contexts, and these are expanding daily. Many non-Western nations have long-standing musical traditions and practices that have entered into the Western mainstream just as Western practices and traditions have influenced the musical cultures of the world to produce new and exciting possibilities for music making. Diversity has been a key element in the selection of topics for discussion, and the examples included here can serve as gateways for other investigations by interested readers. This book is a survey presenting a broad array of representative works. The personalities explored include composers, performers, theorists,

teachers, and organizations. In many cases, the information comes directly from composers whom the author has interviewed. The discussions in this book demonstrate that the world of contemporary music is a fascinating one that offers rich rewards to those interested in understanding the vibrant dynamics of concert music.

Conductors and Composers of Popular Orchestral Music Naomi Musiker
 2014-02-25 World-wide in scope and focusing on the second half of the
 20th century, this work provides biographies and discographies of some
 500 composers and conductors of light and popular orchestral music,
 including film, show, theatre and mood music. The book is arranged in
 two sequences: 1) Biographies and select discographies, both arranged
 alphabetically, of the well-known and better-known conductors and
 composers. These entries also include a list of suggested reading for
 those wishing to further their studies; and 2) Select discographies of
 conductors about whom little or no biographical information is available.
 The bibliography at the end of the book covers discographical sources,
 popular music and film music. This is the first time that the lives and
 recordings of such artists as Kostelanetz, Faith, and Gould as well as the
 orchestral recordings of such great popular composers as Gershwin,
 Kern, Porter, Rodgers, Berlin and Coward have been documented and
 presented in an encyclopedic form.
