Enhancing Counselor Intervention Strategies Sterling K. Gerber 1999 *Enhancing Counselor Intervention Strategies* prepares future professionals by presenting a practical guide to theory and practice, linking learning principles with therapeutic change modalities. This book teaches students the three things they must know in order to be considered competent professionals: a working knowledge of the vast range of treatment options, an understanding of the rationale behind each intervention strategy, and the ability to anticipate realistic outcomes. Gerber simplifies the presentation of key theoretical information by synthesizing it into four groups interpreted according to intervention dynamics. Case studies teach practical application and are easily generalized to help students learn to adapt intervention strategies based on the needs of a wide variety of clients. Further, the book is constructed with the ACA, CACREP, and NBCC assessment standards in mind. This text is appropriate for courses in counseling psychology. It is especially relevant to classes dealing with counseling and learning theories.

Counseling as a Profession Nicholas A. Vacc 1987 This book was written to provide a professional resource which describes comprehensively what a professional counselor is, what a professional counselor does, and where and when a professional counselor works. The first chapter presents a perspective on professional counseling and differentiates between professional counselors and other mental health specialists. Assumptions about professional counselors are discussed and the professional counselor is seen as a practitioner-scientist. The evolution of the counseling profession is reviewed in chapter 2 and the present-day counseling profession is described. The third chapter focuses on the professional preparation of counselors, defining issues in counselor preparation, and examining standards of preparation and accreditation. Chapter 4 reviews various theoretical models of counseling (psychoanalytic, client/person-centered, behavioral, cognitive, and affective models) and looks at counseling theory and practice. Chapters 5, 6, and 7 examine assessment and measurement, career development and counseling, and consultation, respectively. Chapter 8 focuses on research in professional counseling, providing suggestions for research designs, selection of variables and subjects, and statistical analyses. Chapter 9 examines trends in professional counseling, describing trends in both settings where professional counselors work and clientele with whom counselors work. Professionalism in counseling is the focus of chapter 10, which is followed by the Code of Ethics adapted from the Ethical Standards of the American Personnel and Guidance Association. (NB)

In this book, Corey takes readers from forming a working alliance with clients through the processes for setting and achieving goals. His skill at and understanding of the termination processes is worth the entire book. Not only will *The Art of Integrative Counseling* be the core text for counseling process and skills courses, it will provide the foundation for effective, truly integrated counseling throughout one's career." —James Robert Bitter, EdD, East Tennessee State University "Gerald Corey's fourth edition of *The Art of Integrative Counseling* provides important concepts to consider when developing an integrative approach to working with clients. For beginning counselors, it demonstrates how one can be integrative whether one is behaviorally, cognitively, or affectively oriented.
