*Last Trains* Charles Loft 2013-03-27 "The debate about Dr Richard Beeching will rage until the Second Coming - and probably beyond. But in Charles Loft's careful examination of the Beeching Report, we have as fine a study as we

are going to possess in the meantime." - Peter Hennessy "Loft's great strength is his judiciousness. He understands the political processes and assesses them fair-mindedly. And his verdict will, I suspect, hold up better than any of Beeching's judgements." - Matthew Engel, Financial Times "Prepare to be impressed, shocked and saddened ... This is undoubtedly one of the best books of the year - a riveting read." - Railways Illustrated "Lucid, to the point, thought-provoking at every turn, Last Trains is a volume that everyone should read before making judgements about the rail closures of the Sixties." - Heritage Railway "Thoughtful and well-researched analysis." - Edinburgh Evening News \*\*\* During the course of the 1950s England lost confidence in its rulers and convinced itself it must modernise. The failing steam-powered local railways, run by Colonel Blimp, symbolised everything that was wrong with the country - surely the future lay in motorways and high-speed express trains? Along

came Dr Beeching with his diagnosis, and suddenly branch-line Britain was gone for ever. The debate about the Beeching cuts has raged ever since. In this superbly researched examination, Charles Loft exposes the political failures that bankrupted the railways and lays bare the increasing alienation of bureaucrats from the public they were trying to serve. The result is a fascinating study of a nation grappling to come to terms with modernity.

**The London Encyclopaedia (3rd Edition)**

Christopher Hibbert 2011-09-09 'There is no one-volume book in print that carries so much valuable information on London and its history'

Illustrated London News The London Encyclopaedia is the most comprehensive book on London ever published. In its first new edition in over ten years, completely revised and updated, it comprises some 6,000 entries, organised alphabetically, cross-referenced and supported by two large indexes - one for the 10,000 people mentioned in the text and one general - and is illustrated with over 500 drawings, prints and photographs. Everything of relevance to the history, culture, commerce and government of the capital is documented in this phenomenal book. From the very first settlements through to the skyline of today, The London Encyclopaedia comprehends all that is London. 'Written in very accessible prose with a range of memorable quotations and affectionate jokes...a monumental achievement written with real love' Financial Times

**Redefining Indian Smart & Sustainable Cities** Charanjit S Shah 2015-06-06 Redefining Smart & Sustainable Cities, although has been

conceived much earlier and has been continually refined over and over, the recent announcement of 100 Smart Cities by the Hon'ble Prime Minister of India, Mr Narendra Modi, and the spate of events thereafter, has made the release of the book rather accelerated. It unfolds for its readers the thus-far little-known story about smart cities that have existed since centuries and what the existing cities can learn from them. The author has taken interesting habitat traits and important data points right from prehistoric times to the modern day. Parallels have been drawn from various parts of the globe cutting across time - right from the Stone Age to the modern Digital Age. The authors have critically analyzed and shown that since the problems had the same set of root causes the solutions can also lie among some of the thriving and sustainable modern-day smart cities of the world. In fact, through careful extrapolation of habitat aspects the author has shown that many of the sustainable smart cities today have

undergone similar deterioration for at least some time before these cities were restored and made truly smart. Each chapter weaves into it text and explanations written in a direct and simple manner and is interspersed with interesting pictures, drawings, infographics, and facts and figures directly relevant to the topic under discussion. This makes the book a very engaging and interesting read.

**Government, the Railways and the Modernization of Britain** Charles Loft  
2006-09-27 More than 40 years after its publication, the 1963 Beeching Report on British railways remains controversial for recommending the closure of a third of Britain's railways. In this book, Charles Loft examines: why the nationalized railways were in such dire financial straits by 1963 how government work

on future transport needs led to conclusions which would have cut Britain's railways down by thousands of miles what difficulties eventually halted attempts by Conservative and Labour governments to implement these cuts. This book will be invaluable to anyone interested in how transport policy is made or how it has arrived at its current state and sheds fascinating new light on the working of government, the economy and the mood of the times under Churchill, Eden, Macmillan and Wilson.

the London Overground, born in 2007, has  
become one of London's transport success  
stories. Running complimentary to, and in some  
places, in combination with, London  
Underground, it carries more than 180 million  
passengers a year on 9 lines and serves 112  
stations over a combined length of more than  
100 miles. An amalgamation of several  
commuter lines (and one London Underground  
Line) that ring London it now branches out to all  
points of the compass. Over recent years it's also  
undergone unprecedented change and  
investment (with a few troubles along the way)  
with the phasing out of old and the introduction  
of new rolling stock. This book takes a

photographic look at these changes including a  
look at the routes, the stations and the trains  
including Classes 172, 315, 317, 378 and the  
brand new 710s with a brief history of each. And  
with so much freight sharing the Overground  
routes this is briefly looked at as well.
