The Secret Life of Groceries Benjamin Lorr 2021-11-09 "A deeply curious and evenhanded report on our national appetites." --The New York Times In the tradition of Fast Food Nation and The Omnivore's Dilemma, an extraordinary investigation into the human lives at the heart of the American grocery store The miracle of the supermarket has never been more apparent. Like the doctors and nurses who care for the sick, suddenly the men and women who stock our shelves and operate our warehouses are understood as 'essential' workers, providing a quality of life we all too easily take for granted. But the sad truth is that the grocery industry has been failing these workers for decades. In this page-turning expose, author Benjamin Lorr pulls back the curtain on the highly secretive grocery industry. Combining deep sourcing, immersive reporting, and sharp, often laugh-out-loud prose, Lorr leads a wild investigation, asking what does

it take to run a supermarket? How does our food get on the shelves? And who suffers for our increasing demands for convenience and efficiency? In this journey: We learn the secrets of Trader Joe's success from Trader Joe himself Drive with truckers caught in a job they call "sharecropping on wheels" Break into industrial farms with activists to learn what it takes for a product to earn certification labels like "fair trade" and "free range" Follow entrepreneurs as they fight for shelf space, learning essential tips, tricks, and traps for any new food business Journey with migrants to examine shocking forced labor practices through their eyes The product of five years of research and hundreds of interviews across every level of the business, *The Secret Life of Groceries* is essential reading for those who want to understand our food system--delivering powerful social commentary on the inherently American quest for more and compassionate insight into the lives that provide it.

Dictionary for a Better World Irene Latham 2020

"Organized as a dictionary, entries in this book for middle-grade readers present words related to creating a better, more inclusive world. Each word is explored via a poem, a quote from an inspiring person, and a short personal anecdote from one of the co-authors, a prompt for how to translate the word into action, and an illustration"--

The Raging Grannies Carole Roy 2004 Women fought against slavery and offered shelter to hunted runaways, demanded economic justice

for the starving or working poor, raised their voices when rights were trampled, raised their fists when their children were murdered. Women's collective acts of resistance have played, and continue to play, a vital but often unacknowledged role in humanizing social, political, and economic policies. To death, danger, and oppression women have frequently responded in life-affirming ways, their contributions concealed in invisibility and silence for too long, without stories of resistance and opposition. But no more. This is the tale of the Raging Grannies. Their beginning and growth, the invention of their identity, the educational and bold potential of their activism, the values expressed in their actions and songs, and their impact on issues, stereotypes, media, and people. At a time when environmental destruction and war threatened, when the growing chasm between poor and rich endangered justice, a group of women stood up with courageous irreverence to denounce

government lies, corporate greed and short-sightedness, and in the process, created a new cultural figure that challenged authority as well as stereotypes of women. The Grannies' distinctive approach is surprisingly popular and effective: in sixteen years, more than fifty groups of Raging Grannies exist across Canada, in the United States, and as far away as the UK, Australia and Greece (Greek Grannies call themselves Furies). Their popularity reveals the power of creativity and humour, which allow them to claim their space on the political scene, refusing to be dismissed or ignored. The Raging Grannies both records and celebrates this vibrant activism. Bursting with adventures, this is the tale of the Raging Grannies: their beginning, the invention of their identity and their impact on issues, stereotypes, media and people.

Better Law for a Better World Liz Curran
2021-04-19 How as a society can we find ways of ensuring the people who are the most vulnerable or have little voice can avail themselves of the protection in law to improve their social, cultural, health and economic outcomes as befits civilised society? Better Law for a Better World answers this question by looking at innovative practices and developments emerging within law practice and education and shares the skills and techniques that could lead to confidence in the

law and its ability to respond. Using recent research from Australia, practice initiatives and information, the book breaks down ways for law students, legal educators and law practitioners (including judicial officers, law administrators, legislators and policy makers) to enhance access to justice and improve outcomes through new approaches to lawyering. These can include: Multi-Disciplinary Practice (including health justice partnerships); integrated justice practice; restorative practice; empowerment modes (community & professional development and policy skills); client-centred approaches and collaborative interdisciplinary practice informed by practical experience. The book contains critical information on what such practice might look like and the elements that will be required in the development of the essential skills and criteria for such practice. It seeks to open up a dialogue about how we can make the law better. This includes making the community more central to the operation of the law and

improving client-centred practice so that the Rule of Law can deliver on its claims to serve, protect and ensure equality before the law. It explores practical ways that emerging lawyers can be trained differently to ensure improved communication, collaboration, problem solving, partnership and interpersonal skills. The book explores the challenges of such work. It also gives suggestions on how to reduce professional barriers and variations in practice to effectively, humanely and efficiently make a difference in people's lives. The book builds essential skills and new approaches to lawyering for law students, legal educators, new lawyers and seasoned lawyers, judicial members and law administrators to equip them to better respond to community need. It looks at the law in context by also exploring the role of the law in improving the social determinants of health and socially just outcomes.

The Great Disruption Paul Gilding 2012-02-02
It's time to stop just worrying about climate change, says Paul Gilding. Instead we need to brace for impact, because global crisis is no longer avoidable. The 'Great Disruption' started in 2008, with spiking food and oil prices and dramatic ecological change like the melting polar icecap. It is not simply about fossil fuels and carbon footprints. We have come to the end of Economic Growth, Version 1.0, a world economy based on consumption and waste, where we lived beyond the means of our planet's ecosystems and resources. The Great Disruption offers a stark and unflinching look at the challenge humanity faces - yet also a deeply optimistic message. The coming decades will see loss, suffering and conflict as our planetary overdraft is paid. However, they will also bring out the best humanity can offer: compassion, innovation, resilience and adaptability. Gilding tells us how to fight, and win, what he calls 'the

One Degree War' to prevent catastrophic warming of the earth, and how to start today. The crisis we are in represents a rare chance to replace our addiction to growth with an ethic of sustainability, and it's already happening. It's also an unmatched business opportunity: old industries will collapse while new companies literally reshape our economy. In the aftermath of the Great Disruption, we will measure 'growth' in a new way. It will mean not quantity of stuff, but quality, and happiness, of life. And, yes, there is life after shopping. The Great Disruption is an invigorating and well-informed polemic by an advocate for sustainability and climate change who has dedicated his life to campaigning for a balanced use of Earth's limited resources. It is essential reading.
Brand Aid Lisa Ann Richey 2013-11-30 "Has there ever been a better reason to shop?" asks an ad for the Product RED American Express card, telling members who use the card that buying "cappuccinos or cashmere" will help to

fight AIDS in Africa. Cofounded in 2006 by the rock star Bono, Product RED has been a particularly successful example of a new trend in celebrity-driven international aid and development, one explicitly linked to commerce, not philanthropy. In *Brand Aid*, Lisa Ann Richey and Stefano Ponte offer a deeply informed and stinging critique of “compassionate consumption.” Campaigns like Product RED and its precursors, such as Lance Armstrong’s Livestrong and the pink-ribbon project in support of breast cancer research, advance the expansion of consumption far more than they meet the needs of the people they ostensibly serve. At the same time, such campaigns sell both the suffering of Africans with AIDS (in the case of Product RED) and the power of the average consumer to ameliorate it through familiar and highly effective media representations. Using Product RED as its focal point, this book explores how corporations like American Express, Armani, Gap, and Hallmark

promote compassionate consumption to improve their ethical profile and value without significantly altering their business model, protecting themselves from the threat to their bottom lines posed by a genuinely engaged consumer activism. Coupled with the phenomenon of celebrity activism and expertise as embodied by Bono, Richey and Ponte argue that this “causerism” represents a deeply troubling shift in relief efforts, effectively delinking the relationship between capitalist production and global poverty.

Education to Better Their World Marc Prensky 2016 In his most visionary book, internationally renowned educator Marc Prensky presents a compelling alternative to how and what we teach our children. Drawing on emerging world trends, he elaborates a comprehensive vision for K-12 education that includes new goals, new means, a new curriculum, a new kind of teaching, and a new use of technology. “Marc Prensky—one of the smartest people working in

educational reform today—offers us a lucid, inspiring, optimistic, doable, and crucial blueprint for how we can build a future with the schools children desperately need in our modern, high-risk, highly complex, fast-changing, and imperiled world.” —James Paul Gee, Mary Lou Fulton Presidential Professor of Literacy Studies, Regents’ Professor, Arizona State University “Marc Prensky was always ahead of his time. Education to better their world continues this trend in spades. This book is a goldmine and a powerful wakeup call that the future is already here—in pockets right now but a harbinger of what is rapidly emerging. Read the book and make yourself part of the future today. As we are finding in our own work, students are agents of change—in pedagogy, in learning environments, and of society itself. Exciting possibilities await!” —Michael Fullan, Professor Emeritus, OISE/University of Toronto “Marc Prensky’s answer to the question ‘What is the purpose of education?’—that education

should now empower youth to improve their communities and the world—would unleash the energy, creativity, and compassion of students and teachers in ways we have never imagined. We need the better world Prensky envisions and we need it now.” —Milton Chen, The George Lucas Educational Foundation “Prensky offers perhaps the most compelling case and model yet articulated by anyone for today’s globally-empowered children. A must-read book for all educators and anyone who cares about education.” —James Tracey, Head of School, Rocky Hill School, RI “Wow. As a takeaway it is good—very good.” —John Seeley Brown “A great book. Filled with ‘food for thought’, common sense, provocative ideas and fun to read.” —Nieves Segovia, Presidenta, Institucion Educativa SEK (SEK International Schools) **Shopping for a Better World** Benjamin Hollister 1994 Rating more than 2,000 consumer products in 17 industries, this popular reference guide is a must for every informed shopper. Designing Our Way to a Better World Thomas Fisher 2016-05-01 Envisioning what we need, when it doesn't yet exist: this, Thomas Fisher tells us, is what design does. And if what we need now is a better world—functioning schools, working infrastructure, thriving cities—why not design one? Fisher shows how the principles of design apply to services and systems that seem to evolve naturally, systems whose failures sometimes seem as arbitrary and inevitable as the weather. But the “invisible” systems we depend on for our daily lives (in education,

politics, economics, and public health) are designed every bit as much as the products we buy and the environments we inhabit—and are just as susceptible to creative reimaging. *Designing Our Way to a Better World* challenges the assumptions that have led to so much poor performance in the public and private realms: that our schools cannot teach creativity, that our governments cannot predict the disasters that befall us, that our health system will protect us from pandemics, that our politics will remain polarized, that our economy cannot avoid inequality, and that our industry cannot help but pollute the environment. Targeting these assumptions, Fisher's approach reveals the power of design to synthesize our knowledge about the world into greater wholes. In doing so, this book opens up possible futures—and better futures—than the unsustainable and inequitable one we now face.

In Search of a Better World Karl Popper 2012-12-06 'I want to begin by declaring that I regard scientific knowledge as the most important kind of knowledge we have', writes Sir Karl Popper in the opening essay of this book, which collects his meditations on the real improvements science has wrought in society, in politics and in the arts in the course of the

twentieth century. His subjects range from the beginnings of scientific speculation in classical Greece to the destructive effects of twentieth century totalitarianism, from major figures of the Enlightenment such as Kant and Voltaire to the role of science and self-criticism in the arts. The essays offer striking new insights into the mind of one of the greatest twentieth century philosophers.

Visions of a Better World Quinton Dixie
2011-08-30 In 1935, at the height of his powers, Howard Thurman, one of the most influential African American religious thinkers of the twentieth century, took a pivotal trip to India that would forever change him—and that would ultimately shape the course of the civil rights movement in the United States. When Thurman (1899-1981) became the first African American to meet with Mahatma Gandhi, he found himself called upon to create a new version of American Christianity, one that eschewed self-imposed racial and religious boundaries, and equipped

itself to confront the enormous social injustices that plagued the United States during this period. Gandhi's philosophy and practice of satyagraha, or "soul force," would have a momentous impact on Thurman, showing him the effectiveness of nonviolent resistance. After the journey to India, Thurman's distinctly American translation of satyagraha into a Black Christian context became one of the key inspirations for the civil rights movement, fulfilling Gandhi's prescient words that "it may be through the Negroes that the unadulterated message of nonviolence will be delivered to the world." Thurman went on to found one of the first explicitly interracial congregations in the United States and to deeply influence an entire generation of black ministers—among them Martin Luther King Jr. *Visions of a Better World* depicts a visionary leader at a transformative moment in his life. Drawing from previously untapped archival material and obscurely published works, Quinton Dixie and Peter

Eisenstadt explore, for the first time, Thurman's development into a towering theologian who would profoundly affect American Christianity—and American history.

In Search of A Better World Payam Akhavan

2017-09-09 A work of memoir, history, and a call to action, the CBC Massey Lectures by internationally renowned UN prosecutor and scholar Payam Akhavan is a powerful and essential work on the major human rights struggles of our times. Renowned UN prosecutor and human rights scholar Payam Akhavan has encountered the grim realities of contemporary genocide throughout his life and career. He argues that deceptive utopias, political cynicism, and public apathy have given rise to major human rights abuses: from the religious persecution of Iranian Bahá'ís that shaped his personal life, to the horrors of ethnic cleansing in Yugoslavia, the genocide in Rwanda, and the rise of contemporary phenomena such as the Islamic State. But he also reflects on the inspiring resilience of the human spirit and the reality of our inextricable interdependence to

liberate us, whether from hateful ideologies that deny the humanity of others or an empty consumerist culture that worships greed and self-indulgence. A timely, essential, and passionate work of memoir and history, *In Search of a Better World* is a tour de force by an internationally renowned human rights lawyer. David Cooperrider 2021-11-09 Twenty-nine leading scholars and executives provide a visionary look at the future of business, propelling past damaging industrial-age values to uncover the key ingredients of humanistic, ecologically sustainable, and intergenerational

prosperity. Through the exploration of robust cases and stories packed with deep insight and vital science, this extraordinary collection explores how we can adapt our notions of value, markets, and models of cooperation and collective action to create a world where economies and businesses excel, all people thrive, and nature flourishes. Part II, "Net Positive = Innovation's New Frontier," is focused on what companies can and are doing to move away from "doing no harm" to playing an active role in solving environmental, social, and economic problems. The final section, "Ultimate Advantage: A Leadership Revolution That Is Changing Everything," looks at new leadership paradigms—characterized by unexpected qualities like virtue, love, compassion, and

connection—that are crucial to creating engaged, empowered, innovative, and out-performing enterprises. This book is designed to galvanize change and unite a global community of inquiry and action. It establishes the conceptual cornerstones for a new kind of business practice that will lead the way to an equitable, sustainable, and flourishing future.

2021-11-30 Caritina Piña Montalvo personified the vital role played by Mexican women in the anarcho-syndicalist movement. Sonia Hernández tells the story of how Piña and other Mexicanas in the Gulf of Mexico region fought for labor rights both locally and abroad in service to the anarchist ideal of a worldwide community of workers. An international labor broker, Piña never left her native Tamaulipas. Yet she excelled in connecting groups in the United States and Mexico. Her story explains the conditions that led to anarcho-syndicalism's rise as a tool to achieve labor and gender equity. It also reveals how women's ideas and expressions of feminist beliefs informed their experiences as leaders in and members of the labor movement. A vivid look at a radical activist and her times, *For a Just and Better World* illuminates the lives and work of Mexican women battling for labor rights and gender equality in the early twentieth century.

The Day the World Stops Shopping J.B.

MacKinnon 2021-05-25 Consuming less is our best strategy for saving the planet—but can we do it? In this thoughtful and surprisingly optimistic book, journalist J. B. MacKinnon investigates how we may achieve a world without shopping. We can't stop shopping. And yet we must. This is the consumer dilemma. The economy says we must always consume more: even the slightest drop in spending leads to widespread unemployment, bankruptcy, and home foreclosure. The planet says we consume too much: in America, we burn the earth's resources at a rate five times faster than it can regenerate. And despite efforts to "green" our consumption—by recycling, increasing energy efficiency, or using solar power—we have yet to see a decline in global carbon emissions. Addressing this paradox head-on, acclaimed journalist J. B. MacKinnon asks, What would really happen if we simply stopped shopping? Is

there a way to reduce our consumption to earth-saving levels without triggering economic collapse? At first this question took him around the world, seeking answers from America's big-box stores to the hunter-gatherer cultures of Namibia to communities in Ecuador that consume at an exactly sustainable rate. Then the thought experiment came shockingly true: the coronavirus brought shopping to a halt, and MacKinnon's ideas were tested in real time. Drawing from experts in fields ranging from climate change to economics, MacKinnon investigates how living with less would change our planet, our society, and ourselves. Along the way, he reveals just how much we stand to gain: An investment in our physical and emotional wellness. The pleasure of caring for our possessions. Closer relationships with our natural world and one another. Imaginative and inspiring, *The Day the World Stops Shopping* will embolden you to envision another way. *Why We Buy* Paco Underhill 1999 The

culmination of 15 years of meticulous research and observation, this riveting audiobook offers hilarious anecdotes and amazing hard facts about one of America's favorite pastimes. Abridged. 7 CDs.
