Woodfuel Markets in Developing Countries: A Case Study of Tanzania Jill Boberg 2017-11-01 This title was first published in 2000: Woodfuels in developing countries, particularly Africa, remain a basic need for urban households, who depend heavily on them for their energy needs. This work examines the confusion about the environmental and social impacts of woodfuel use, and the structure of informal sector woodfuel markets. Using data from a year of survey field work in Tanzania, the author questions assumptions of poorly functioning woodfuel markets and their impact on environment and society. Approaching the unregulated woodfuel markets as industrial organizations, the author uses a classic structure previously applied to developed markets in industrialized countries, to determine the competitiveness and efficiency of woodfuel markets. Results indicate well-functioning makets under most circumstances and the study details the variables which enhance market sustainability. The social and environmental implications of woodfuel use as it exists, and suggestions to policymakers for improvements to enhance the sustainability of the

system and the environment, complete the study. The study should be useful for those interested in energy and environmental issues or informal markets (including agricultural markets) in developing countries, and to those interested in industrial organization as applied to the Third World.

Short Paper Tanganyika. Geological Division 1928

Shifting Burdens Shahra Razavi 2002 * Details the effects of structural adjustment policies imposed on agriculture, and their effect on gender relations within rural areas in the developing world * Empirically grounded case studies from India, Mexico, South Africa, Uganda, and Vietnam Over the past ten years neoliberal policy shifts in rural development across the globe have reduced the role of government, consigning the costs of services to the rural poor themselves. But what are the gender effects of this change? The contributors unravel the ways in which economic and social structures, institutions, and policy outcomes are mediated by gender as a social relationship, and consider the degree to which a "diversified livelihoods strategy," touted as the means by which rural families are struggling to improve their standard of living, accurately describes what is taking place on the ground.

Managing Motherhood, Managing Risk Denise Allen 2009-10-22 In *Managing Motherhood, Managing Risk*, Denise Roth Allen persuasively argues that development interventions in the Third World often have unintended and unacknowledged consequences. Based on twenty-two months of fieldwork in the Shinyanga Region of west central Tanzania, this rich and engaging ethnography of women's fertility-related experiences highlights the processes by which a set of seemingly well-intentioned international maternal health policy recommendations go awry when implemented at the local level. An exploration of how threats to maternal health have been defined and addressed at the global, national, and local levels, *Managing Motherhood, Managing Risk* presents two contrasting, and oftentimes competing, definitions of risk: those that form the basis of international recommendations and national maternal health policies and those that do not. The effect that these contrasting definitions of risk have on women's fertility-related experiences at the local level are explored throughout the book. This study employs an innovative approach to the analysis of maternal health risk, one that situates rural Tanzanian women's fertility-related experiences within a broader historical and sociocultural context. Beginning with an examination of how maternal health risk was defined and addressed during the early years of British colonial rule in Tanganyika and moving to a discussion of an internationally conceived maternal health initiative that was launched on the world stage in the late 1980s, the author explores the similarities in the language used and solutions proposed by health development experts over time. This set of "official" maternal health risks is then compared to an alternative set of risks that emerge when attention is focused on women's experiences of pregnancy and childbirth at the local level. Although some of these latter risks are often spoken about as deriving from spiritual or supernatural

causes, the case studies presented throughout the second half of the book reveal that the concept of risk in the context of pregnancy and childbirth is much more complex, involving the interplay of spiritual, physical, and economic aspects of everyday life.

Advances in Data, Methods, Models and Their Applications in Geoscience
 DongMei Chen 2011-12-22 With growing attention on global environmental and climate change, geoscience has experienced rapid change and development in the last three decades. Many new data, methods and modeling techniques have been developed and applied in various aspects of geoscience. The chapters collected in this book

present an excellent profile of the current state of various data, analysis methods and modeling techniques, and demonstrate their applications from hydrology, geology and paleogeomorphology, to geophysics, environmental and climate change. The wide range methods and techniques covered in the book include information systems and technology, global position system (GPS), digital sediment core image analysis, fuzzy set theory for hydrology, spatial interpolation, spectral analysis of geophysical data, GIS-based hydrological models, high resolution geological models, 3D sedimentology, change detection from remote sensing, etc. Besides two comprehensive review articles, most chapters focus on in-depth studies of a particular method or technique.

Indigenous Religions Stephen Hunt 2017-03-02 This volume on Indigenous Religions in The Library of Essays on Sexuality and Religion series focuses on indigenous religions and their attitudes towards human sexuality. Through previously-published articles the volume gives full scope to attitudes towards sexuality found in a vast range of contrasting expressions of religiosity outside of the so-called 'World Faiths'. Examples are taken from cultures as far afield as Africa, Australasia, South America and the Pacific islands. Part 1 includes a number of articles centring on the role of sexuality in rites of passage and initiation in relation to liminality, maturity and reproduction. Part 2 examines the relationship between sexuality, spirit possession and witchcraft. Part 3 includes such areas as religion, gender, patriarchy and both heterosexuality and non-heterosexuality. The final part considers sexuality and indigenous religions in a changing and globalised world and entails the themes of sexuality as expressed through 'cargo cults', pilgrimage and religiosity in the context of colonial dominance.

Contemporary Perspectives on African Moral Economy Isaria N.

Kimambo 2008 The topic of African moral economy was first raised by Goran Hyden in 1980 as one of the main obstacles to economic transformation of the African peasantry. The suggestion caused serious

academic debates between the proposer and other scholars on African societies, especially those using political economy as the framework of their analysis. But Hyden continued to defend his thesis until interest in the debate faded out. More recently Japanese scholars have taken up the topic as it appears to have new relevance in comparison with the fast transformations which have taken place in Southeast Asian rural communities. The focus of this book is to give a detailed comparison between African rural communities and those of Southeastern Asia. Attention is focused on the two main aspects of African peasantry life: the right to subsistence and the norm of reciprocity. A wide interdisciplinary approach is employed to demonstrate the dynamism displayed by these societies.

Developmental Science and Sustainable Development Goals for Children and Youth Suman Verma 2018-10-24 This book presents new scientific knowledge on using developmental science to improving lives of children and youth across the globe. It highlights emerging pathways to sustainability as well as the interconnectedness and interdependence of developmental science and sustainable children and youth development globally. Presenting cross-cultural views and current perspectives on the role of developmental science in the realization of the Sustainable Development Goals for children and youth development, contributors from different disciplines from low-and-middle-income countries or scholars working in these countries capture ground realities of the situation of children and youth in these regions. This book addresses developmental issues related to inequity, gender, health, education, social protection, and needs of vulnerable populations of children and youth. Other areas of focus are improving mechanisms and monitoring frameworks of development and well-being indicators.

The Shinyanga Experience Tom van Miert 2001 With the ongoing water sector reforms, which began in the 1990's, focus has now been directed to reversing this approach by emphasizing on community ownership and management of the improved water facilities. These reforms essentially call for water user commitment, rights and obligations to own and manage the installed facilities. In Shinyanga Region, the policy has been interpreted into a unique Water User Group Concept, which in practice provides the legal protection of ownership and management of hand pump wells to an organized and registered group of individual families. This booklet therefore gives a brief account of the Shinyanga experiences in attempting to implement the Water User Group (WUG) Concept and the practical lessons learnt in that process.

British Colonial Development Policy After the Second World War Rohland

Schuknecht 2010 The concept of "development" is one of the lasting legacies of the late colonial era in Africa. Taking Sukumaland in Tanzania as a reference, this book explores British colonial ideas about rural "development" and examines the results of their application after 1945.

Colonial attempts to change African systems of agriculture are discussed extensively and critically assessed. Other issues like the exploitative character of British colonial development policy in the postwar period, the role of cooperatives, and the connection between development policy and decolonisation are also addressed. This book is the published version of author Rohland Schuknecht's doctoral thesis.

Rural Livelihoods and Diversity in Developing Countries Frank Ellis

2000-06-29 Rural families in developing countries make a living by engaging in diverse activities. These range from farming, to rural trade, to migration to distant cities and even abroad. This book explores the implications of rural livelihood diversity for key topics in development

studies and for poverty reduction policies. The livelihoods approach is gaining momentum, and this is the first book to set it out in detail.

Climate and Land Degradation Mannava V.K. Sivakumar 2007-08-28

In many parts of the world, climatic variations are recognized as one of the major factors contributing to land degradation impacting on agricultural systems performance and management. To accurately assess sustainable land management practices, the climate resources and the risk of climate-related or induced natural disasters in a region must be known. Only when climate resources are paired with management or development practices can the land degradation potential be assessed and appropriate mitigation technologies be developed. This book is based on an International Workshop held in Arusha, Tanzania and should be of interest to all organizations and agencies interested in sustainable land management to arrest land degradation.
