The names Albrecht Dürer and Hans Holbein the Younger evoke the dazzling accomplishments of Renaissance panel painting and printmaking, but they may not summon images of stained glass. Nevertheless, Dürer, Holbein, and their southern German and Swiss contemporaries designed some of the most splendid works in the history of the medium. This lavish volume is a comprehensive survey of the contribution to stained glass made by these extraordinarily gifted draftsmen and the equally talented glass painters who rendered their compositions in glass. Included are discussions of both monumental church windows and smaller-scale stained-glass panels made for cloisters, civic buildings, residences, and private chapels. The subjects of these rarely seen drawings and panels range from religious topics to secular themes, including love, planets, hunts, and battles. Focusing on stained glass produced in Germany and Switzerland from about 1495 to 1530, *Painting on Light* includes drawings by Dürer, Holbein, Albrecht Altdorfer, Hans Baldung Grien, Jörg Breu the Elder, Hans Burgkmair, Urs Graf, Hans von Kulmbach, Hans Leu the Younger, Niklaus Manuel Deutsch, Hans Schäufelein, Hans Weiditz, and others. This informative book is published in conjunction with an exhibition at the Getty Museum from July 11 through September 24, 2000, and from November 7, 2000, to January 4, 2001, at the Saint Louis Art Museum.

Our book offers much, much more than "just projects" - it will fast become the go-to reference for all home crafters. Many glass art how-to books on the market provide precise patterns and instructions for projects that are fairly traditional in technique, materials and style. Completing a project from those books leaves you with a piece that is ideally identical to what the author created - and to what every other student using the book created. Many books are strong in the basics but do not do enough to challenge us to stretch our imagination, experiment with new styles, and explore materials. Readers want creative challenge and stimulation, and Quarry delivers with this complete glass art curriculum"--
